Procedure:

Heat phase B to 80°C until homogeneous. Add slowly phase A to phase B while stirring. Cool down to 55°C. Heat phase C to 60°C while vigorous stirring. Add phase C to phase A/B and stir until homogeneous. Below 45°C add phase D and below 40°C add phase E while stirring until homogeneous. Fill the bulk directly into suitable packaging.

Notes:

The intense metallic pink color of the Velvet Lip Lacquer is created by combining an organic color dispersion with two pearlescent pigments and one pigment dispersion. The addicting pink tone is obtained by tuning the organic color base with Colorona® Carmine Red and Timiron® Snowflake MP-99. Timiron® Snowflake MP-99 also adds a good amount of sparkle. The mirror-like silver effect is achieved by Timiron® Liquid Silver. Enjoy this eccentric Velvet Lip Lacquer for beautiful lips!
