#### Procedure:

Formula development and manufacturing made by Chromavis S.p.A., Italy.

#### Notes:

This exclusive baked powder is a composition of three attractive, luminescent skin tone shades. The sophisticated composition of colorants, functional fillers (RonaFlair® Flawless and RonaFlair® Extender W) and silvery pearlescent pigment (Timiron® Halo White and Timiron® Supersheen MP 1001) allows an easy application with brush, small sponge or fingertip. In the darkest shade Colorona® Imperial Topaz is delivering the color intensity and supports the smoothness of the texture. One can use it as illumination powder for a perfect make-up finish or set highlights on chin, cheeks, nose or forehead as strobing face powder. The discreet silvery shimmer is also applicable for an evening make-up and looks nicely on the décolleté.
