who we are

March 2021

EMD
Electronics

Merck KGaA, Darmstadt, Germany holds the rights to the name and trademark “MERCK” internationally, except for the United States and Canada.

we are unique

Every day, our 58,000 employees work in 66 countries to make a positive difference to millions of people’s lives by creating more joyful and sustainable ways to live.

EMD
serono

Millipore
Sigma

EMD
Electronics

In the U.S. and Canada we operate as EMD Serono in the biopharmaceutical business, MilliporeSigma in the life science business, and EMD Electronics in the high-tech materials business.

We are **EMD Electronics**

Our product and service portfolio has been designed to enable the future of electronics in our data-driven world.

The focus of our business is electronics. This is reflected in our new name. EMD Performance Materials is now EMD Electronics.

After successfully repositioning our strategic direction, it is time to have a name that reflects who we are.

EMD ELECTRONICS

We are the company behind the companies, advancing digital living.

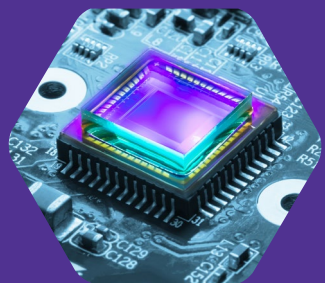

Electronics starts with us.

Our science sits inside technologies that are changing the way we create, access, store, process and display information.

OUR BUSINESSES

Semiconductor Solutions

Semiconductor Materials

are at the heart of Electronics and enable the transformation of communications, mobility and healthcare. We unlock the potential for smaller, faster, and more powerful devices.

Delivery Systems & Services

safely guards the molecule of semiconductor and display materials. We provide high-quality delivery and storage of specialty chemicals and gases.

Display Solutions

offers next generation material, equipment systems and services that revolutionize Electronics. We help to connect the intelligence inside devices with human experience.

Surface Solutions

helps redefine the use of color in modern living. Our broad portfolio of pigments and active ingredients continue to drive value in the Automotive, Cosmetic and Industrial industries.

INNOVATION IN ELECTRONICS IS DRIVEN AT THE ATOMIC LEVEL.

This is where we enable smaller, brighter, faster, more impactful, more energy efficient solutions.

- **Our excellence with atoms and molecules fuels our customers' success.**
It's how we deliver with such precision, purity, reliability and safety.
- **We bring the world closer together atom by atom.**
As the company behind the companies, we are advancing digital living.

What sets us apart for our customers

Innovation to Keep You Ahead

Strong reputation for roadmap driven innovation with industry leading R&D investment and execution. Transforming Electronics through new materials that make the difference.

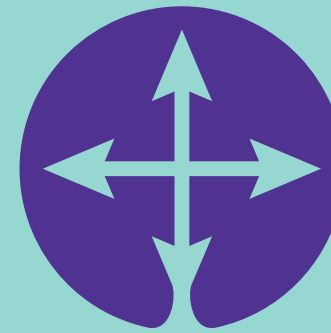

Quality and Reliability

Focus on quality, safety and consistency in purity across our product portfolio. Facilitated by advanced analytics.

Over 350 years of Commitment

Over 350 years of dedicated customer commitment. Enabling collaboration with industry leaders built on teamwork and trust.

Depth and Breadth

More to offer with one of the broadest portfolios across both the Semiconductor and Display industries. Our global, yet local, footprint and supply chain make us ready when and where our customers need us.

People and Purpose

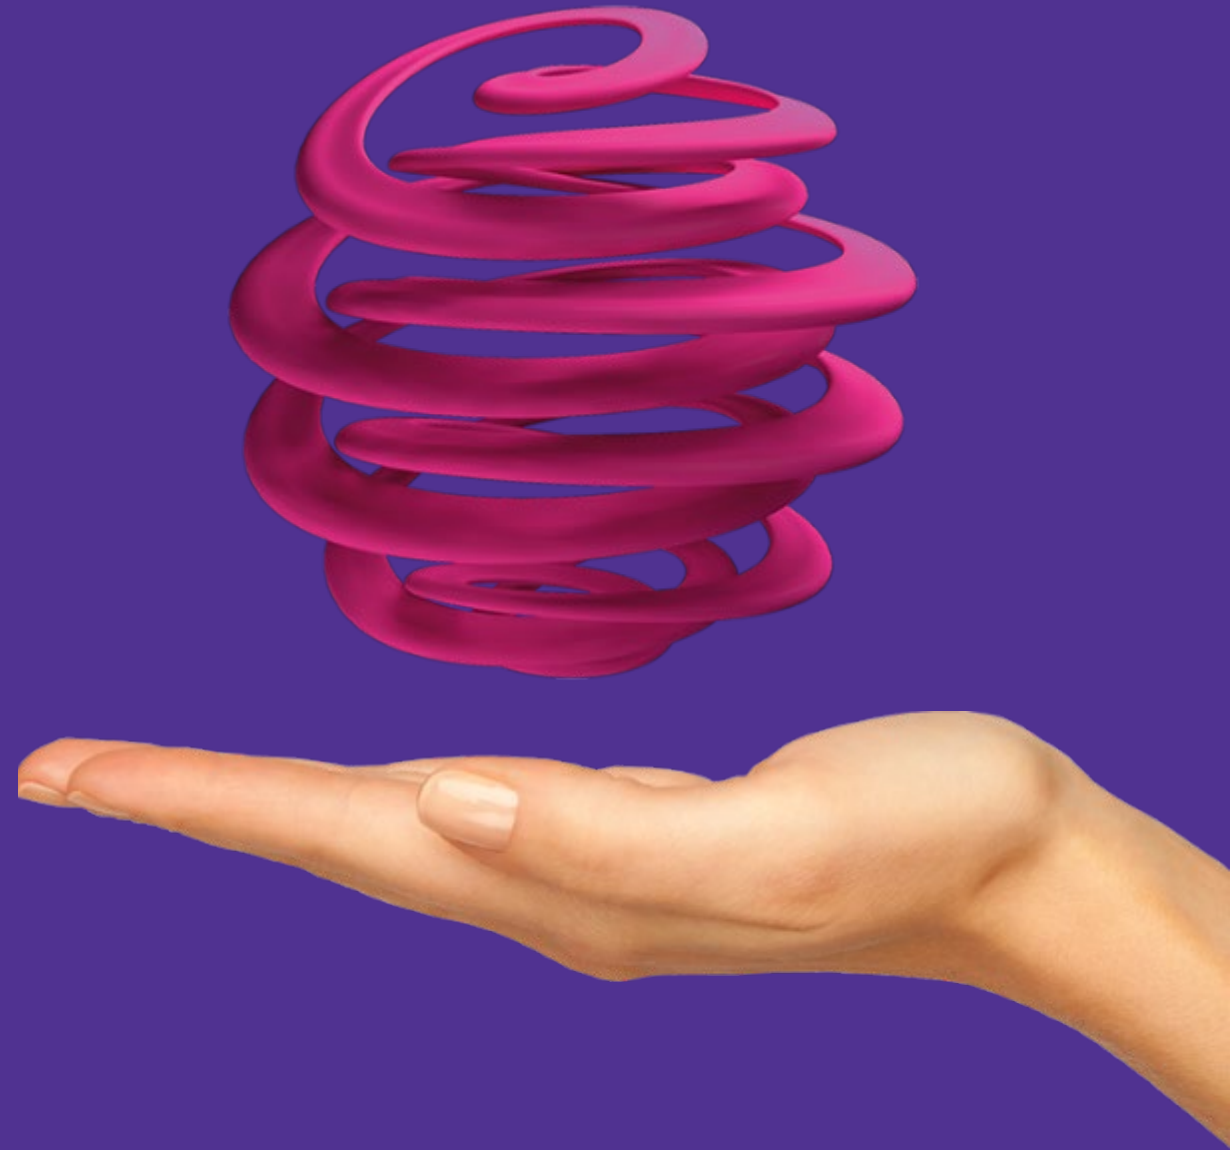

A leading team of industry experts at key locations, cocreating with our customers with relentless curiosity and a passion to win.
