Cautionary Note Regarding Forward-Looking Statements and financial indicators

This communication may include “forward-looking statements.” Statements that include words such as “anticipate,” “expect,” “should,” “would,” “intend,” “plan,” “project,” “seek,” “believe,” “will,” and other words of similar meaning in connection with future events or future operating or financial performance are often used to identify forward-looking statements. All statements in this communication, other than those relating to historical information or current conditions, are forward-looking statements. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond control of Merck KGaA, Darmstadt, Germany, which could cause actual results to differ materially from such statements.

Risks and uncertainties include, but are not limited to: the risks of more restrictive regulatory requirements regarding drug pricing, reimbursement and approval; the risk of stricter regulations for the manufacture, testing and marketing of products; the risk of destabilization of political systems and the establishment of trade barriers; the risk of a changing marketing environment for multiple sclerosis products in the European Union; the risk of greater competitive pressure due to biosimilars; the risks of research and development; the risks of discontinuing development projects and regulatory approval of developed medicines; the risk of a temporary ban on products/production facilities or of non-registration of products due to non-compliance with quality standards; the risk of an import ban on products to the United States due to an FDA warning letter; the risks of dependency on suppliers; risks due to product-related crime and espionage; risks in relation to the use of financial instruments; liquidity risks; counterparty risks; market risks; risks of impairment on balance sheet items; risks from pension obligations; risks from product-related and patent law disputes; risks from antitrust law proceedings; risks from drug pricing by the divested Generics Group; risks in human resources; risks from e-crime and cyber attacks; risks due to failure of business-critical information technology applications or to failure of data center capacity; environmental and safety risks; unanticipated contract or regulatory issues; a potential downgrade in the rating of the indebtedness of Merck KGaA, Darmstadt, Germany; downward pressure on the common stock price of Merck KGaA, Darmstadt, Germany and its impact on goodwill impairment evaluations as well as the impact of future regulatory or legislative actions.

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included elsewhere, including the Report on Risks and Opportunities Section of the most recent annual report and quarterly report of Merck KGaA, Darmstadt, Germany. Any forward-looking statements made in this communication are qualified in their entirety by these cautionary statements, and there can be no assurance that the actual results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, us or our business or operations. Except to the extent required by applicable law, we undertake no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

This presentation contains certain financial indicators such as EBITDA pre adjustments, net financial debt and earnings per share pre adjustments, which are not defined by International Financial Reporting Standards (IFRS). These financial indicators should not be taken into account in order to assess the performance of Merck KGaA, Darmstadt, Germany in isolation or used as an alternative to the financial indicators presented in the consolidated financial statements and determined in accordance with IFRS. The figures presented in this statement have been rounded. This may lead to individual values not adding up to the totals presented.

Agenda

- 01** Business overview
- 02** Transforming the company
- 03** Healthcare – Executing on the earnings phase
- 04** Life Science – Focusing on profitable growth
- 05** Electronics – Leveraging portfolio shift
- 06** Sustainability
- 07** Guidance & executive summary

business overview

01

Group

Three high-tech businesses competing in attractive markets

Leading in specialty
pharma markets

- Biologics and small-molecule **prescription medicines** against cancer, multiple sclerosis, infertility
- **Research** focus: Oncology, Immunology & Immuno-Oncology
- **Successful portfolio management:** e.g. divestment of Consumer Health and Allergopharma

Leading life science
company

- Tools and services for **biotech research & production**
- **Tools and laboratory supply** for academic research and industrial testing

Leading company in
high-tech solutions

- High-tech solutions and materials for **electronics**
- BroaMattd portfolio of **decorative and functional solutions**

Group

Group today – three strong pillars as basis for profitable growth

FY 2020 contribution to¹

Sales

EBITDA pre

1. Healthcare

Global specialty innovator poised for above-industry growth

- **Resilient core business** backed by excellent life cycle management
- **Strong growth** from new products, late-stage pipeline assets with blockbuster potential
- **Rigorous cost discipline** and value-maximizing pipeline prioritization

2. Life Science

Diversified industry leader poised for above-market growth

- **Portfolio advantage** and outperformance drive above-market growth
- **Strengthen core:** products (PS), chemistry (RS), lab water (AS)
- **Establish new pillars:** PS services, gene editing and novel modalities

3. Electronics

Leading electronics player poised for accelerating growth

- **Growing semiconductor share** as key driver for acceleration
- **More resilient growth** through rising diversification
- **Strict cost discipline** in maturing parts of the portfolio

¹EBITDA pre share excluding Corporate & Others; 2020 EBITDA pre restated for €365 m patent litigation provision release Acronyms: PS = Process Solutions, RS = Research Solutions, AS = Applied Solutions

Group

The 2016 vision – a strategic agenda until 2022

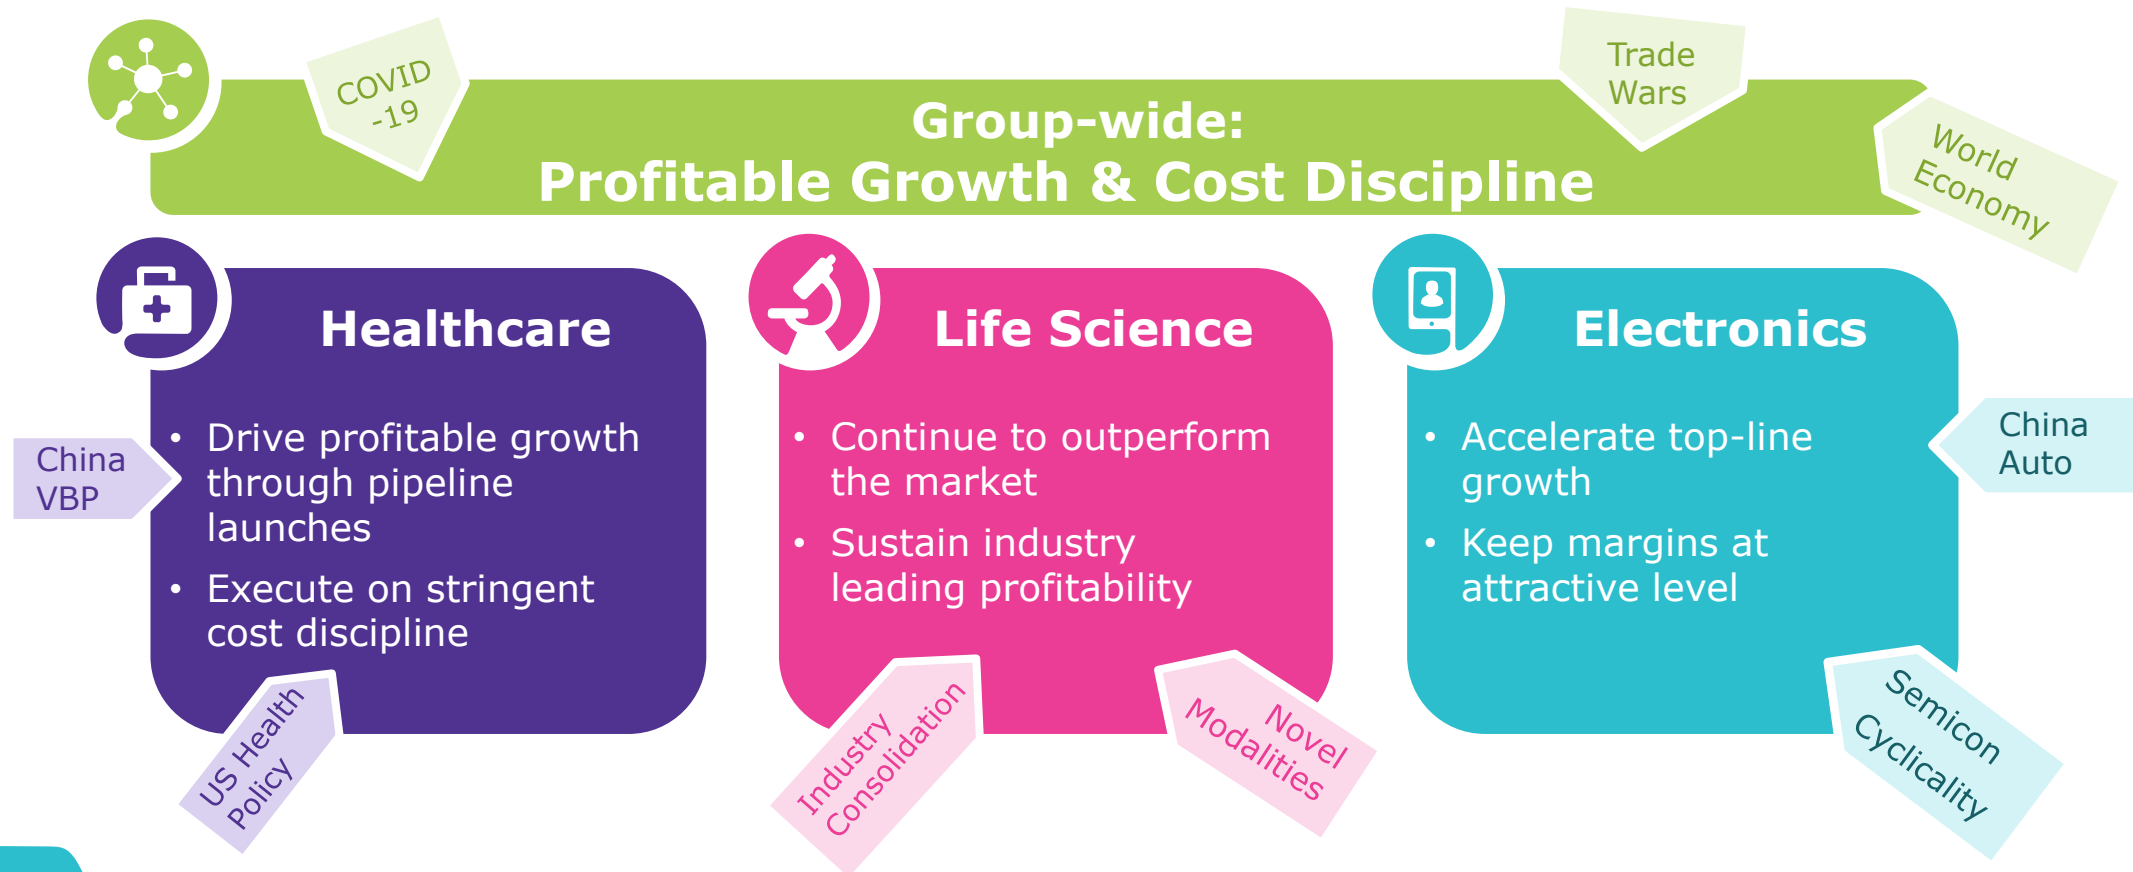

Executing on the growth and expansion phase of the 2016-22 strategic agenda

✓ = delivered; ↗ = well on track

Group

2021 and beyond – poised for growth in a challenging environment

Staying on course in a potentially volatile environment

Acronym: VBP = volume based procurement

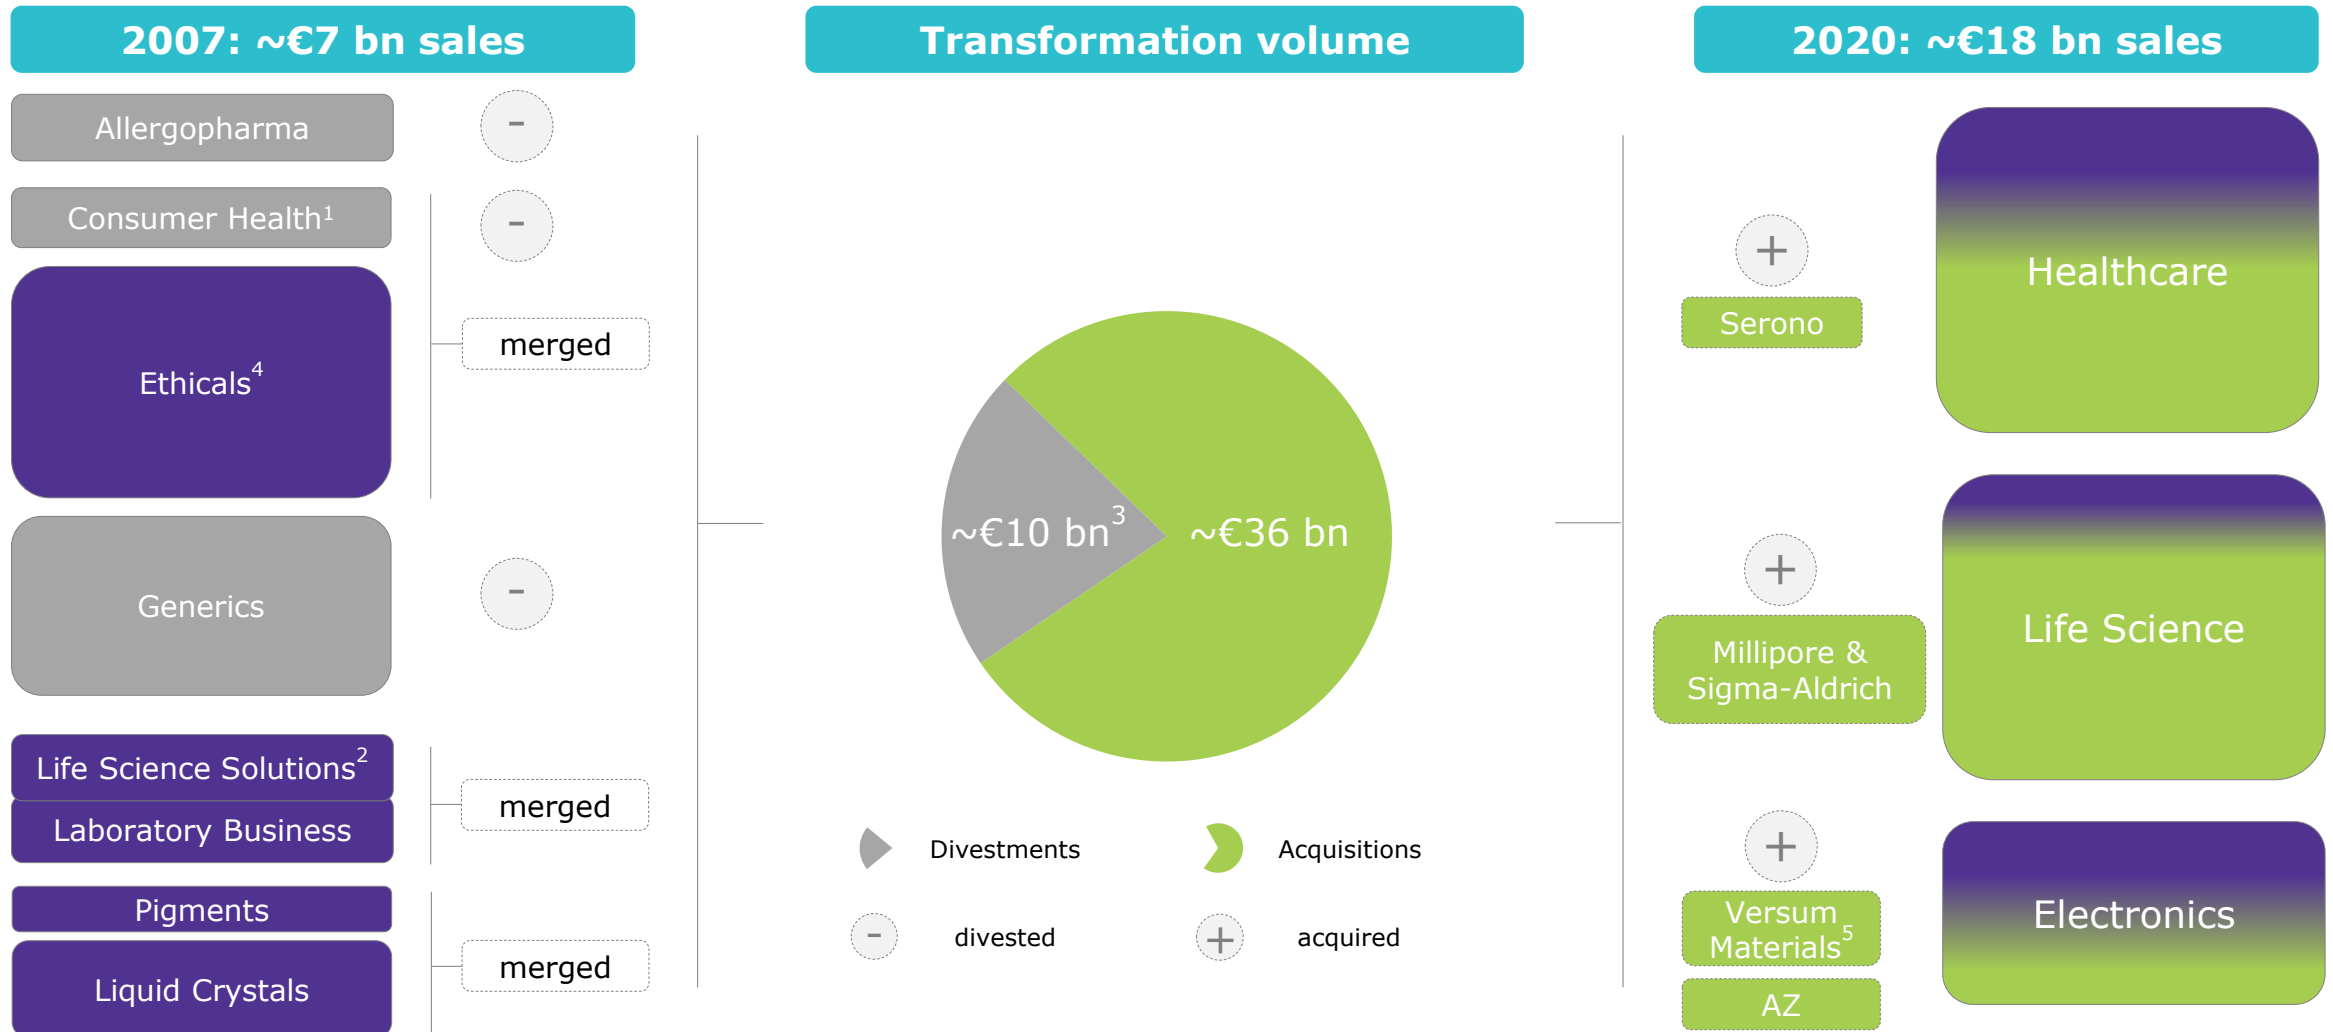

transforming
the company

02

Group

We have added scale and strengthened the attractiveness of our portfolio

Group

Continue to transform to a science and technology focused company

¹Included since 2 May 2014; ²2007 and 2014 EBITDA pre margin adjusted for comparability; ³2018 net sales reflect Consumer Health divestiture (reduction of ~€1 bn net sales p.a.)

⁴2020 margin restated for €365 m patent litigation provision release

Group

All three business sectors delivering on their strategic priorities

Healthcare

- **Accelerating organic growth** with rising contribution from launches (Mavenclad[®], Bavencio[®])
- **Margin trough behind, pipeline progressing well**

Life Science

- **Above-market organic growth** paired with **industry-leading margin**
- Significant **growth investments** (organic, inorganic & partnerships)

Electronics

- Significant portfolio change **towards higher growth business** (Semi, OLED)
- **Margin stabilizing** at ~30% amid sound execution of Bright Future

¹ Company estimate based on industry data and reporting by peers

Group

Clear set of priority goals

Healthcare

- Deliver on ambition to keep core business at least stable until 2022
- Transition from investment to earnings phase by 2019
- Foster successful Bavencio[®] and Mavenclad[®] ramp up
- Stringent pipeline execution

Life science

- Strengthen position as differentiated player in a highly attractive market
- Maintain consistent above-market growth trajectory and superior profitability

Electronics

- Deliver ambition of 3-4% CAGR
- Implement 5-year transformation program and focus on seamless integration of Versum and Intermolecular; to deliver financial ambition of around 30% margin
- Maintain strong cash generation and cash conversion

*based on FY 2020

Three-pillar structure – positioned to win in high-growth markets

Global economy¹

**Global
GDP**

~3% to 4%

End markets¹

Global pharma industry
~4% to 5%

Global life science industry
~5% to 6%

Global electronics industry
~4%

~4% to 5%

Focus market areas¹

Oncology: ~10%
Immunology: ~5% to 9%

Biologics: ~10% to 12%
Services: ~7% to 8%

Semi materials: ~4% to 6%

6%-plus

**Purposefully positioned in attractive markets with secular growth above global GDP
...further focusing investments on attractive sub-segments**

¹ Company estimates of mid-term growth outlook based on industry forecasts and reports from public research institutes (e.g. IMF, IQVIA, EvaluatePharma, Prismark, etc.)

Group

Three main drivers of growth to 2022 and beyond

Beyond 2022: further significant growth potential from "BIG3" and increasing contributions from other businesses

¹ 2019 Group sales of €16.2 bn; ² Including Versum portfolio effect

Portfolio strategy – from transformation to evolution

Deleveraging and **organic growth investments**
in focus until **2022**

- Primarily **organic growth** from “**BIG3**”
- Selective **bolt-ons** possible if budget allows

**Strong portfolio: significant organic growth potential to 2022 and beyond
...and higher likelihood of regular bolt-ons post 2022**

¹ 2019 Group sales of €16.2 bn

Healthcare

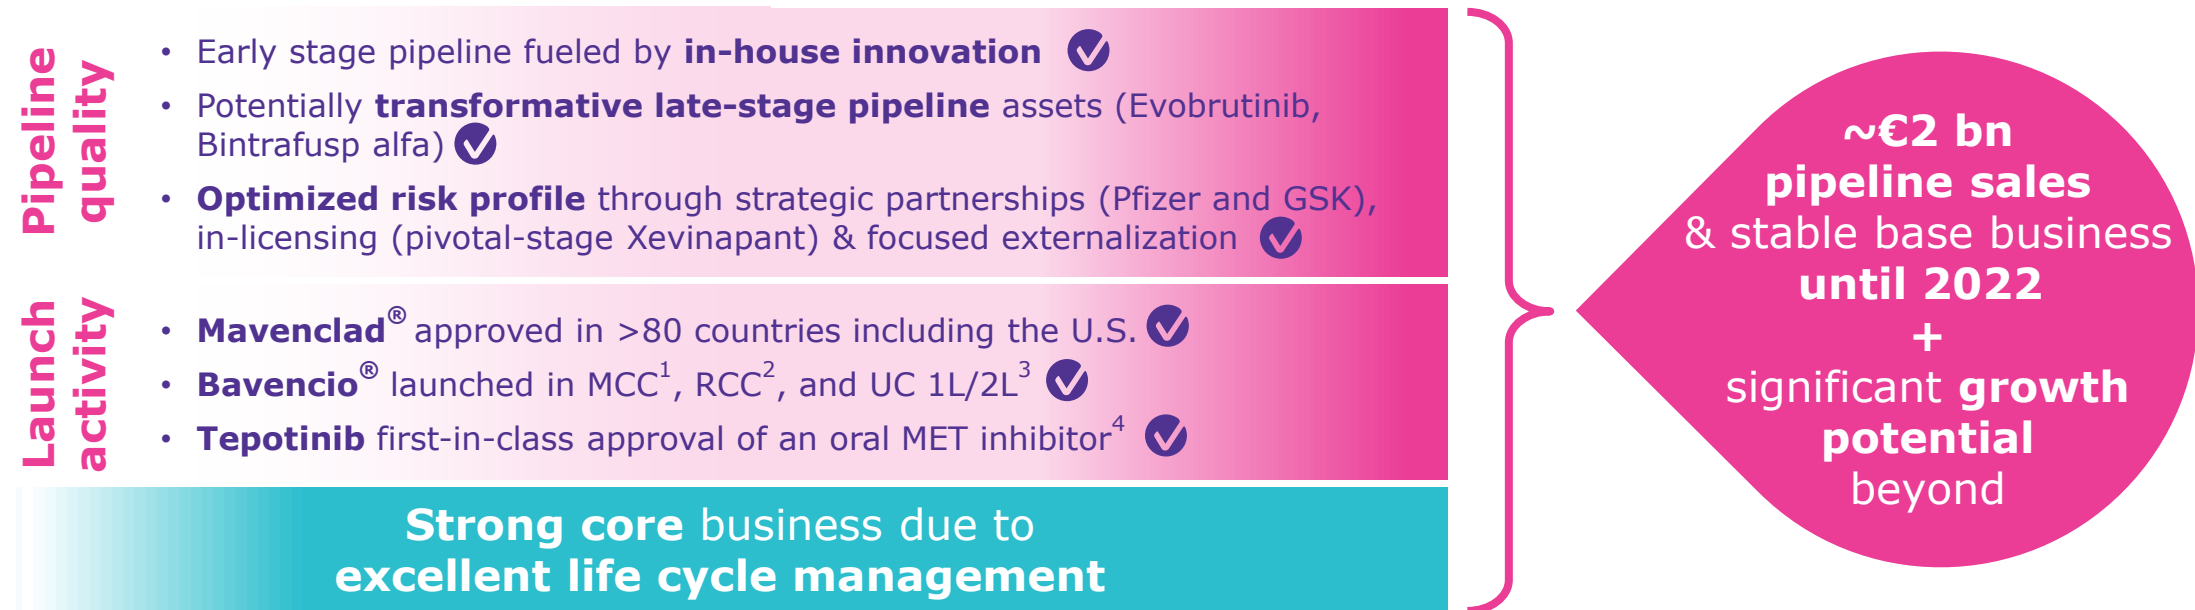

Executing on the earnings phase

03

Creating optionality through **focused pipeline approach**

Pipeline and launch progress supported by strong base

Mid-term outlook Healthcare

 **Confirming financial ambition of a stable base business and ~€2 bn pipeline sales until 2022 with further significant growth potential beyond**

¹ MCC = Merkel Cell Carcinoma, launched in all major jurisdictions; ² RCC = Renal Cell Carcinoma, launched in all major jurisdictions; ³ UC = Urothelial Carcinoma, 1L = first line, 2L = second line, launched in all major jurisdictions; ⁴ approved in Japan and U.S.

Healthcare: Base Business

Confirming ambition to keep base business at least stable to 2022

Healthcare base business net sales until 2022

Core business with **36 consecutive quarters of growth** (Q2 2011 – Q1 2020)

Growth to **pick up after COVID-19 impact**, further **growth potential after 2022**

¹ EM: emerging markets; ² Cardiovascular, Metabolism and Endocrinology (new Franchise name as of Q1 2021)

Healthcare: Sales from Pipeline

Mavenclad and Bavencio launches on track for ~€2 bn pipeline ambition in 2022

- Global peak sales: €1.0–1.4 bn
- Approved in >80 countries, including USA, EU, Canada and Australia
- Dynamic market volume still lags pre pandemic levels by ~20% but increased vaccination likely to drive market recovery and Q2 growth

- Approved for aRCC (USA, EU, Japan), mMCC (50 countries incl. USA and EU), and UC 2L (USA, Canada, Israel)
- Approved for UC 1L in US on June 30, 2020, in EU on January 25, 2021 and in Japan on February 24, 2021
- Phase III read-out remaining: NSCLC 1L (est. primary completion date: October 2021)

Tepotinib

- Approved in Japan on March 25, 2020 (Sakigake and ODD granted in 2018 & 2019)
- Approved in US on February 3, 2021 (granted priority review under RTOR)

Bintrafusp alfa

- Multiple potentially registrational studies across various tumor types ongoing

ILLUSTRATIVE - Not to scale;

Acronyms: BTB = Breakthrough Designation; ODD = Orphan Drug Designation; IA = Interim Analysis; RTOR = Real-Time Oncology Review; sBLA = Supplemental Biologics License Application

Independent real-world data (RWD) differentiates Mavenclad®

- A high-efficacy DMT that demonstrates **full antibody response to COVID-19 vaccination**
- **Differentiated vs. other high-efficacy therapies** in light of COVID-19 vaccinations for MS patients

Patient population		Total N=125	Protective humoral immunity ^a
DMT treated patients	Mavenclad®	23	100% ($p = 0.99$) ^b
	Ocrelizumab	44	22.7% ($p < 0.0001$) ^b
	Fingolimod	26	3.8% ($p < 0.0001$) ^b
Untreated MS patients		32	100%
Healthy subjects		47	97.9%

In the first-ever real-world data study of its type **all patients on Mavenclad® who received a mRNA COVID-19 vaccine were able to mount a full antibody response**, similar to healthy subjects and untreated people with MS, irrespective of lymphocyte counts¹

DMT = disease-modifying therapy

1. Achiron et al. Ther Adv Neurol Disord <https://doi.org/10.1177/17562864211012835>

^aProtective humoral immunity defined as a index value higher than 1.1 using EUROIMMUN semiquantitative ELISA for IgG specific for the recombinant S1 subunit of SARS-CoV-2 spike protein

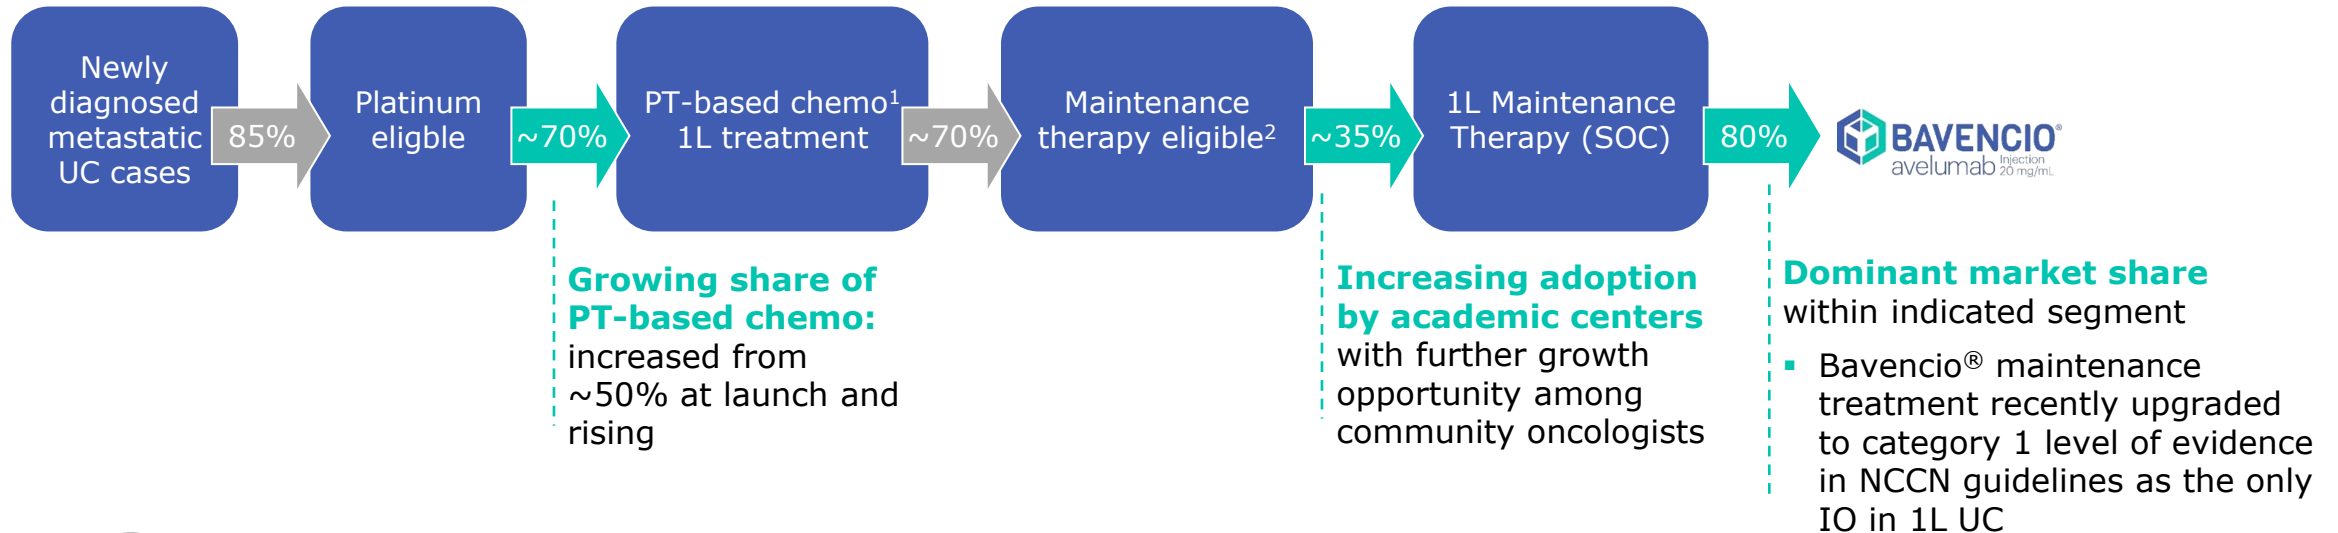

^bFisher's exact test to detect differences in categorical variables between DMT-treated patients with MS and untreated patients with MS

Bavencio® UC 1L launch update: Significant opportunity to drive further growth by increasing the adoption of 1L maintenance therapy

U.S. - ~10 months into launch, on track to changing the SOC:

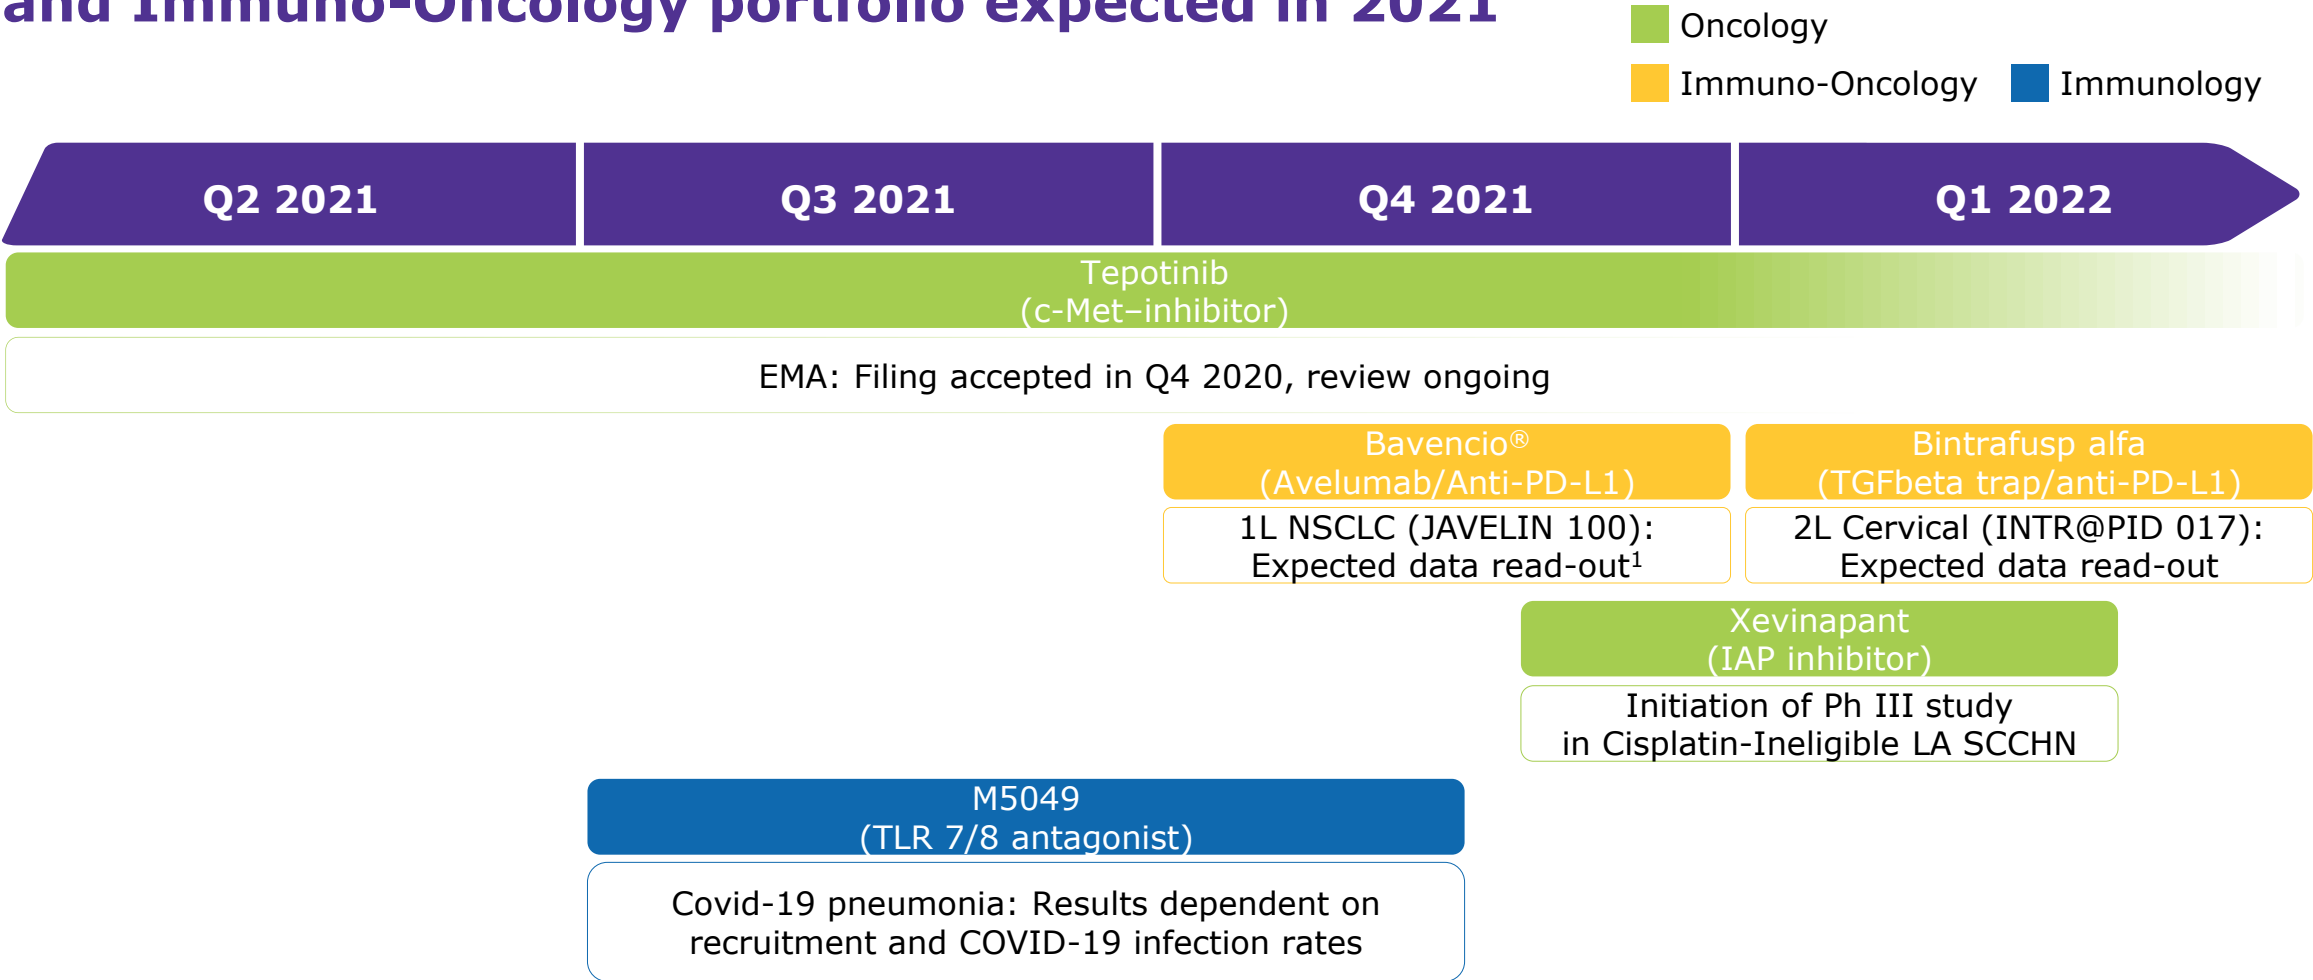

Europe & Japan – Recently approved, promising early signals:

- Market access on track
- Strong initial uptake in key launch markets
- Recently recommended by EAU (European Association of Urology) guidelines (March 25) as the preferred treatment in 1L UC

1: Carboplatin or Cisplatin, 2: Complete / partial response or stable disease based on clinical trial data; Acronyms: PT = Platinum, SOC = Standard of care

Healthcare catalysts – Significant developmental progress across Oncology and Immuno-Oncology portfolio expected in 2021

Acronyms: EMA = European Medicines Agency, LA = locally advanced, SCLC = Small cell lung cancer, SCCHN = Squamous cell carcinoma of the head and neck, NSCLC = Non-small cell lung cancer, TLR = Toll-like receptor, 1: Clinical timelines are event-driven and may be subject to change

Life science

Focusing on profitable growth

04

Life Science

Building growth momentum with focus on attractive market segments

Total Life Science Market¹
~€170-180 bn; ~5-6% CAGR

Mid-term outlook
Life Science Business Sector

 **Upgrading** mid-term financial ambition to **6-9% organic sales CAGR**

¹ Company estimate of the market segments, based on industry forecast over 5-year horizon; all growth rates in 3x3 Matrix indicate external market growth

Improved mid-term outlook driven by market and portfolio focus

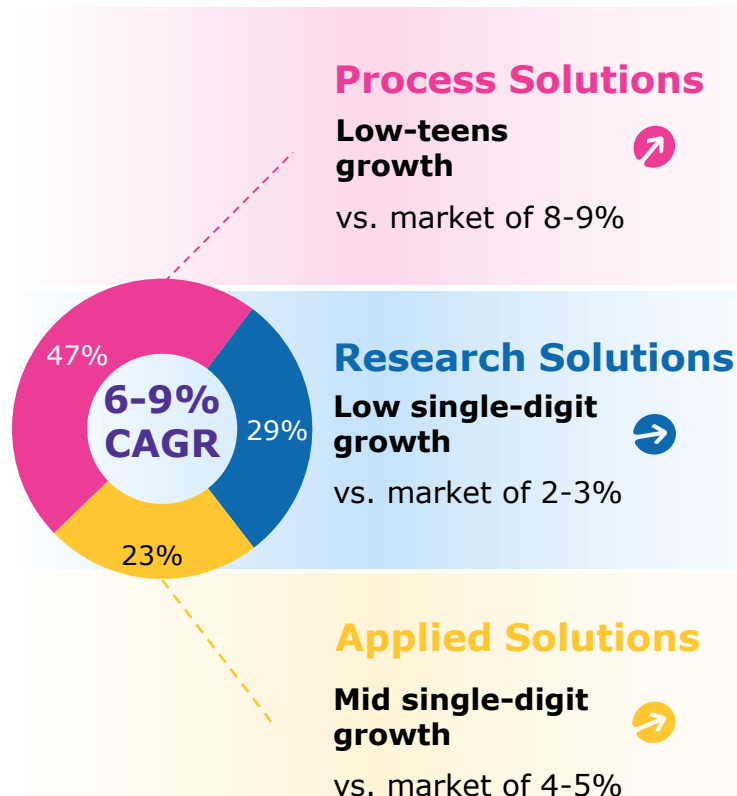

- **Market outlook improving** further, mainly due to **Process** segment
- **Above-market growth set to continue** due to **portfolio advantage** and **outperformance**

¹ Company estimate based on industry forecast over 5-year horizon

All business units contributing to above-market growth

Sales split¹

Mid-term outlook²

Customer Split³

Fundamental growth drivers

- **Biologics:** global mAbs⁴ production growing by ~11-15% p.a. for 2020-2024⁵ driven by new molecules and biosimilars
- **Diversification:** contribution by top 10 molecules will decline to ~30% until 2024 from ~50% in 2020⁶
- **Novel modalities:** cell & gene therapy market with >30% CAGR 2020-2024⁵, complex delivery drives demand for services and viral vectors
- **Research activity:** >9,000 pre-clinical projects in research pipelines⁷; rising number of experiments backs healthy growth in biotechs/CROs⁸
- **Public and private funding:** availability, access and predictability drive demand from academia and emerging biotechs
- **Emerging technologies:** high growth technologies for drug discovery and development, e.g. advanced cell culture and AI drug discovery
- **Regulation:** rise in quality standards and increasing demand for testing across customer segments
- **Population and economic growth:** demand for access to more sophisticated products and services rises, e.g. in emerging markets
- **Speed:** need for fast testing results raises requirements for Applied customers, esp. in clinical testing and food & beverage testing

Customer Segments: **P** Pharma and Biotech **I** Industrial and Testing **A** Academia **D** Diagnostics

¹ Based on H1 2020, CAGR is organic mid-term ambition; ² growth rates are organic CAGRs; ³ indicative only; ⁴ mAbs = monoclonal antibodies; ⁵ Source: company estimate based on industry forecasts;

Critical offering in the fight against COVID-19

PRODUCTS feed into...

www.sigmaaldrich.com/covid-19

VIRUS DETECTION

- Leading critical component provider for Molecular and Serological diagnostic kits
- PCR reagents, kits and tools for all stages of assay development

VIRUS CHARACTERIZATION

- Offering is among largest biologic reagents and hardware portfolios
- Effective vaccines and therapies start with reliable virus characterization
- Highest quality reagents needed for understanding of viral attachment, genomics, or proteomics

VACCINE & THERAPY PRODUCTION

- Supporting global COVID-19 vaccine and therapy response effort:
 - **Upstream and downstream research and scaling**
 - **End-to-End solutions**
 - **Biosafety Testing Services**

Life Science: Upside potential for Process Solutions materializing amid increasing capacity; Research Solutions gaining momentum as well

Organic growth versus LY by Quarter

Key factors for 2021 guidance remain:

- Further progress of capacity expansions & optimizations
- Sustainable demand growth; both Covid-19 and underlying

electronics

Leveraging the portfolio shift

05

Electronics

Portfolio shift leads to greater resilience and accelerated growth

of customers
[that make up 80% of Sales]

Mid-term outlook
Electronics

Updating mid-term financial ambition to 3-4% organic sales CAGR

Electronics

Portfolio refocus drives mid-term guidance upgrade to 3 to 4% CAGR

Sales split¹

Mid-term outlook²

Business Split³

Fundamental growth drivers

- Continued market growth due to technological advances (Artificial intelligence, 5G, Big Data and cloud, Internet of Things) serving customers in **Logic, Memory, Packaging and others**
- 4 to 6% market growth⁴
- 200 to 300bps above-market growth from share gains & better portfolio (incl. 100 to 150bps additional growth from integration top-line synergies)
- Driven by trend to **bigger TV size, higher resolutions, more mobile devices**
- 3 to 4% growth of total LCD m² area⁵, while price pressure continues
- 18 to 22% growth of total OLED m² area⁵ with slight to moderate market share gains
- OLED material market to exceed LC material market by 2021⁶
- Well balanced exposure to **automotive** and **cosmetics** end market
- Drivers: rising living standards, higher disposable income in growing markets & higher demand for high value products at reasonable prices
- Light vehicle production and relevant cosmetics end markets returning to growth in 2021 and reaching 2019 levels by 2022 and beyond⁷

¹ Based on FY 2020, CAGR is organic mid-term ambition; ² growth rates are organic CAGRs; ³ indicative only

⁴ Source: Jan 2020 IC Insights 2018-2024 CAGR for wafer starts in million units; ⁵ Source: Omdia Display Market Outlook, Q1 2020; ⁶ Internal Business Intelligence; ⁷ Sources: LMC Automotive Light Vehicles Forecast, Aug 2020 & Euromonitor BPC (Beauty & Personal Care) Aug 2020

5-year transformation program Bright Future is well on track

¹New mid-term CAGR guidance starting 2020

Electronics

Strategic roadmap materializing

Measures for a bright future

Darmstadt

- In Darmstadt focus on R&D and production
- Immediate bottom line contribution from 2019 onwards
- Reduce the number of FTEs by ~15% = ~400 FTEs

Chilworth

- Chilworth site during September 2019 successfully closed

Atsugi

- Shut down of Electronics activities at Atsugi site started (to be completed during 2021)
- R&D and production activities in Atsugi transferred and consolidated in other PM locations in Asia
- Consolidation of site structure in Japan

- Leading supplier of high-purity process chemicals, gases and equipment serving semiconductor manufacturers
- Track record of accelerated growth and industry leading profitability
- Creating a **leading electronic materials player** with **attractive long-term prospect**

INTERMOLECULAR®

- Leading in advanced materials innovation
- Acquisition to strengthen semiconductor technology offering
- Application specific **materials expertise with** that **perfectly complement** Group's business and technology portfolio

Bottom-line management to support margin ambition of 30% in the long-term

Both transactions successfully closed

Successful integration drives substantial synergy upgrade and acceleration

EBITDA pre impact of synergy ramp-up [€ m]

Original target for 2022 is now being addressed for 2021

Sources of synergies

*Top-line synergies from cross-selling, new products introductions and overarching initiatives

sustainability

06

Sustainability strategy enhanced, leveraging strengths with clear commitment to new targets

Potential to increase sustainable value for business and society

High-Impact SDGs		Where we can contribute	and benefit	
	3 GOOD HEALTH AND WELL-BEING Good Health and Well-being	➤ We are able to contribute with dedicated products, know-how, partnerships and initiatives in pharma, science and technology.	Goal 1 3	Business opportunities <ul style="list-style-type: none"> Develop a new range of sustainable products & services, benefiting from our innovation power Open up additional customer groups and expand regional reach
	8 DECENT WORK AND ECONOMIC GROWTH Decent Work and Economic Growth	➤ Our ambition of future growth considers health and safety of employees also in the supply chain.	1 2	Risk management <ul style="list-style-type: none"> Reduce risks through higher awareness and longer-term view Secure supply chain resilience
	9 INDUSTRY INNOVATION AND INFRASTRUCTURE Industry, Innovation and Infrastructure	➤ Our innovation power will lead to more sustainable products and processes in various industries.	1 2	Partnerships <ul style="list-style-type: none"> Contribute as supplier of choice to customers' ESG strategy Improve ESG impact of our suppliers
	12 RESPONSIBLE CONSUMPTION AND PRODUCTION Responsible Consumption and Production	➤ Being a responsible supplier, we will also challenge suppliers to support in reaching company targets.	2 3	Operations <ul style="list-style-type: none"> Increase attractiveness as employer
	17 PARTNERSHIPS FOR THE GOALS Partnerships for the Goals	➤ To unleash even more power, we foster collaborations with capable partners to sum up know-how for more sustainable impact.	1 3	<ul style="list-style-type: none"> Reduce costs of capital Benefit from grants and reliefs (politics, insurance, etc.) Incentivize through integrated compensation schemes

Reduce our environmental footprint:

Environmental targets 2020 have been achieved, new targets set

Achievements 2020

Reduce scope 1+2 emissions

Emissions target 2020 achieved!

- ✓ 25% overall reduction for Scope 1 and 2 emissions in 2020 relative to 2006 (planned: 20%)

Reduce water in stressed areas

Water target 2020 achieved!

- ✓ Water use in stressed areas reduced by 27% in 2020 vs. 2014 (planned: 10%)
- ✓ By 2020, all production sites⁴ successfully implemented sustainable water management system

Reduce Group Waste Score

Waste target ongoing & on track!

- ✓ Based on Group Waste Score, reduced environmental impact by 4.6% vs. 2016 (planned: 5% by 2025)

¹versus 2006 baseline, excluding Versum Materials

²versus 2014 baseline

³versus 2016 baseline

⁴Sites > 70.000 m³/a

New targets from 2021

- Aiming for **climate neutrality** (scope 1 to 3 emissions) **by 2040** 
- **Lower scope 1 and 2 GHG⁵ emissions by 50%** and to source 80% of purchased electricity from renewable sources until 2030 vs. 2020 baseline
- **Absolute reduction of 1,500 kt⁶ scope 3 CO₂ equivalents by 2030**
- Enhancing water efficiency and **improve the new Group water intensity score by 10% by 2025** vs. 2019 baseline 
- Minimize negative environmental impacts, **harmful emission residues should be lowered** below a scientifically defined threshold by 2030

⁵GHG = Greenhouse Gas

⁶corresponds to ~30% of 2019 scope 3 emissions (current estimation incl. Versum Materials)

Next steps towards achieving ESG targets

AGENDA 2020-2022

Analysis of requirements: Strategy, business, regulation, stakeholders

Develop SBV tool² to measure product sustainability value

Link ESG¹ to board compensation

Build effective data platform for internal steering

Develop ESG KPIs for reporting

Further incorporate ESG in R&D, controlling, M&A and supply chain

Decide on dedicated investments and initiatives to achieve targets

2030 targets

¹ESG: Environmental, Social, Governance

²Sustainable Business Value: Dive in deeper and read the research article on the [SBV method](#)

Guidance and Executive Summary

07

Latest COVID-19 assumptions for 2021

Overarching assumptions

- **Increasing vaccination penetration** across large populations **in all major regions** as of summer
- **Global gradual easing of lockdowns to continue; vaccination efforts expected to keep up** with virus mutations
- **Overall improvement** in the course of 2021 to continue; **however, higher degree of forecast uncertainty**

Healthcare assumptions

- **Confirm ~ stable organic base business & pipeline sales target**, despite higher uncertainty
- Pandemic **impact on ramp-ups** (particularly still depressed MS dynamic & high efficacy market in Q1 2021) **remains a watch out; recent vaccination data expected to accelerate market position of Mavenclad[®]**
- **Fertility to continue recovery**

Life Science assumptions

- **Continued strong additional demand & capacity expansions to support strong growth in Process Solutions**
- **Research and Applied** more volatile and differentiated across customer and product segments; **tailwinds for Research, about neutral effect in Applied**

Electronics assumptions

- **Neutral to positive impact on Semiconductor Solutions** end markets
- **Display and Surface Solutions to return to underlying trajectories**

Full-year 2021 guidance

Net sales:

Organic: +10% to +12% YoY

FX: -2% to -4% YoY

~€18.5 – 19.5 bn

EBITDA pre:

Organic: +16% to +20% YoY *(excl Biogen¹)*

FX: -2% to -4% YoY

~€5.4 – 5.8 bn

EPS pre:

~€7.50 – 8.20

¹ Q3 20 reversal of the provisions for the patent litigation proceedings for Rebif in the amount of ~€365 m; Guidance including Biogen – organic: +9% to +12%

Executive SUMMARY

Group

Successfully driving transformation into a leading science and technology company

steady earnings growth with high margins and a low risk profile

setup

Three-pillar structure strengthened further as a resilient basis; COVID-19 crisis as another proof point

Growth Engines

Healthcare pipeline, Process Solutions and Semiconductor Solutions will be key drivers of growth to 2022 and beyond

Execution

Delivery on strategic priorities ensures profitable growth; regaining financial flexibility with higher likelihood of regular bolt-ons post 2022

Appendix

Group

Successful crisis management increasingly mitigates pandemic impact

Quarterly Net Sales in €m^{*}

Underlying developments

- **Life Science well positioned** for new COVID-19 driven demand trends
- **Process business** rapidly addressing new market needs, **fueling net upside**
- Research and Applied **driving recovery in Q3**
- **Fertility: well managed return** to pre COVID-19 levels - not yet all regions
- **Strong Mavenclo® recovery** being driven since June
- **Bavenclo® UC launch** progressing very well on a largely virtual launch
- **General Medicine** on track with good volume development
- Managing visible **recovery in Q3**, but not yet growing organically
- **Semiconductors Solutions' strength** within strong market
- Net downside from COVID-19 in **Display and Surface**

* At fixed 2019 FX rates

Guidance upgrade proof point of **excellent crisis management** and **strong business performance**

Group

2020 – strong resilience in times of global crisis

- **2020 guidance confirmed; recovery started in June**
- **Most businesses growing** despite COVID-19
- **Largest business** growing and **positively affected**
- Smallest businesses with biggest impact

Delivery on priorities during crisis

- ✓ **Health & safety of employees**
- ✓ **Business continuity**
- ✓ **Contributions to public health and society**
- ✓ **Sustainability aspects further enforced**

Growth and COVID-19 impact by business¹

CMD 2019

Merck KGaA, Darmstadt, Germany - steady earnings growth with high margins and a low risk profile

¹ Indicative only and based on guidance from August 6: slight to moderate organic sales and EBITDA pre growth, COVID-19 with up to a mid single-digit impact on sales of which 50-60% hitting EBITDA pre

2021 business sector guidance¹

Healthcare

Net sales

- Organic: +7% to +10%
- Mainly driven by Mavenclad[®], Bavencio[®] and recovery of Fertility
- Base business organically around stable

EBITDA pre

- Organic: +12% to +15% YoY (excl Biogen²)
- FX: -5% to -7% YoY
- ~€2,000 – 2,100 m

Life Science

Net sales

- Organic: +15% to +18%
- Process Solutions as main growth driver

EBITDA pre

- Organic: +22% to +26% YoY
- FX: -1% to -3% YoY
- ~€2,850 – 3,000 m

Electronics

Net sales

- Organic: +5% to +7%
- Strong Semiconductor Solutions contribution, subject to quarterly DS&S project phasing
- OLED with high growth

EBITDA pre

- Organic: +9% to +12% YoY
- FX: -3% to -5% YoY
- ~€1,050 – 1,130 m

¹Business Sector guidances are only support to the group guidance and do not have to add up; ² Q3 20 reversal of the provisions for the patent litigation proceedings for Rebif in the amount of ~€365 m; Guidance including Biogen – organic: -4% to -6%

Additional financial guidance 2021

Further financial details

Corporate & Other EBITDA pre	~ €-440 to -490 m
Interest result	~ €-220 to -245 m
Effective tax rate	~22% to 24%
Capex on PPE	~€1.4 to 1.5 bn
Hedging/USD assumption	FY 2021 hedge ratio ~70% at EUR/USD ~1.17
2021 Ø EUR/USD assumption	~1.19 to 1.23

Underlying tax rate guidance lowered to new range of 22% to 24%

Tax rate development 2018-2020 and from 2021 onwards

Rationale for update

Strong profit growth in Life Science results in different profit contributions worldwide, leading to a lower overall tax rate

Group

Focus on organic growth and deleveraging to 2022

Proven swift deleveraging after major acquisitions

- **Deleverage to <2x** net debt/EBITDA pre in 2022
- **M&A on hold until 2022**; only smaller deals to be realized if budget available
- New mid-term capex ceiling of ~€1.3 bn reflects **increased focus on organic investment** and Versum consolidation
- Dividend policy mirrors **sustainable earnings trend**

UPDATE

Sustainable dividend growth

Dividend¹ development 2014 -2020

2020 dividend

- Dividend of €1.40 (+8% YoY) per share proposed¹ for 2020
- Payout ratio of 23.1% of EPS pre² in 2020; aiming for 20-25% of EPS pre
- Dividend yield³ of 1.0%

¹Final decision is subject to Annual General Meeting approval

²Excluding Biogen provision release, including the provision release the ratio is 20.9%

³Calculated with 2020 year-end share price of € 140.35 per share.

Governance

Merck's KGaA, Darmstadt, Germany ownership structure

Executive board compensation

Pay for performance reflecting the company's long-term strategy

Variable	40-50%	Long-Term Incentive Plan <ul style="list-style-type: none"> Reflecting the long-term strategy for Group's growth and (from 2022) sustainability ambition 4 years performance cycle: 3 years target achievement + 1 year holding period Based on virtual Group Share Units (Grant € divided through start share price, multiplied with the end share price) Financial targets: 50% Company Share Price vs. DAX + 25% EBITDA pre margin + 25% Organic sales growth From 2022 multiplied with sustainability factor (0.8-1.2) reflecting KPIs from each of the sustainability goals Corridors for each target and achieved targets published transparently ex-post in the compensation report Maximum cap: Maximum pay out 250%, maximum € cap for LTIP for each board member published Claw-back allows to retain amounts allocated from the Long-Term Incentive Plan 	<div> <div>+</div> <div>Performance of Group share price vs. the DAX 50%</div> </div> <div> <div>+</div> <div>EBITDA pre margin in relation to target value 25%</div> </div> <div> <div>+</div> <div>Organic sales growth in relation to target value 25%</div> </div> <div> <div>x</div> <div>0.8-1.2 Sustainability factor</div> </div> <div> <div>=</div> <div>0-180% of allocated units</div> </div>
	25-35%	Profit Sharing <ul style="list-style-type: none"> Three-years average profit after tax of the E. Merck Group KGaA, Darmstadt, Germany, multiplied with individual permille rate From 2021 reduced individual performance factor of 0.8-1.2 can increase (bonus) or decrease (malus) the amount based on a set of criteria, incl. the 3 sustainability goals, disclosure of catalogue and reasons for if performance factor ≠ 1.0 Individual permille rate for each board member and maximum € cap for each board member published Staggered incentivization and minimum threshold value and maximum limit for profit after tax (0.75/2.0 bn €) Mandatory personal investment in Company Shares amounting to one third of the net payment of the profit sharing (4 year holding period) 	
	6-9%	Pension Entitlements	Defined contribution
Basic	0-3%	Additional Benefits	Mainly contributions to insurance policies, personal security expenses, company car...
	15-20%	Basic Compensation <ul style="list-style-type: none"> Fixed and non-performance related compensation Paid in 12 equal monthly installments 1.4 million € for the chairman / up to 1.1 million € for the members of the executive board 	
Maximum total compensation: reduced to €11.5 m Chairman, €9.5 m other executive board members			

External stakeholders assess our engagement

As of 2020, Merck KGaA, Darmstadt, Germany received an **MSCI ESG* Rating of AAA**.

*Environment, Social, Governance

2021, we received an **ESG Risk Rating** of 19.5 and **Sustainalytics: low risk** of experiencing material financial impacts from ESG factors.

Since 2008, Company is part of **FTSE4Good Index**, measuring the performance of companies with strong ESG practices (top 15).

In 2020, Merck KGaA, Darmstadt, Germany has once more achieved **prime status** by **ISS Oekom**.

In 2019, the Group share was again **included in STOXX Global ESG Leaders Index**, a sustainability index based on key environmental, social and governance criteria.

Company has been **reconfirmed** as a constituent of the **Ethibel Sustainability Index (ESI) Excellence Europe** since May 2020, based on VigeoEiris.

Company for the second time received platinum status in 2021, among the **top 1% of companies**. **EcoVadis** annually examines ~75,000 suppliers from 160 countries.

In the 2021 **Access to Medicine Index** Group ranked **eighth place**. We were recognized for our performance in R&D, where we ranked fifth.

CDP Climate: In 2020, we scored **"B"** (2019: C). **CDP Water:** In 2020, we received a **"B"** (2019: B).

Group

Regular portfolio review remains key to success

strong track record

- Acquisitions and divestments are part of Group's history
- Licensing and partnerships remain on our agenda
- All prior transactions earned their cost of capital

defining portfolio guard rails

- Three strong pillars with no business marginalized
- Leading market position in attractive markets
- Focus on innovation and sustainability through science and technology

clear financial M&A criteria

- Supporting profitable growth strategy
- $IRR > WACC$
- EPS pre accretive
- Maintain investment grade rating

 **Current set-up is strong and organic investment opportunities are attractive**

 **Expect to regain financial flexibility by 2022 to pursue external growth opportunities**

 **Targeted and more regular bolt-on approach more likely than large transformative deals**

Life Science demand drives particularly strong growth in North America and Asia-Pacific

Q1 2020 Regional breakdown of net sales [€m]

Regional organic development

- APAC: strong Life Science and Healthcare growth while Electronics ~ stable with Semi offsetting Display
- Europe: Growth in Process & Research Solutions more than compensates Healthcare decline largely in CM&E
- North America: growth across all three sectors, particularly strong Life Science and Bavencio[®] performance
- LATAM growth driven foremost by Fertility and Bavencio[®]
- CM&E is the largest growth driver in ME&A

27% organic growth in Life Science, moderate Healthcare growth & stable Electronics drive very strong organic Group sales and EBITDA pre growth

Q1 YoY Net Sales

	Organic	Currency	Portfolio	Total
Healthcare	3.5%	-5.9%	-1.2%	-3.6%
Life Science	26.7%	-6.2%	0.0%	20.4%
Electronics	0.2%	-4.5%	0.0%	-4.3%
Group	12.2%	-5.8%	-0.4%	6.0%

- 22% org. growth in Fertility and 20% org. growth in Oncology more than compensate for N&I decline (-4% org.) amid depressed dynamic market and VBP impact in CM&E¹ (-4% org.)
- Record Life Science organic growth driven by all business units with Process Solutions up +38%; Research elevated to +24%; Applied Solutions delivers 8% organic growth
- Electronics about stable as Semiconductor Solutions growth (+4% org.) and recovering Surface Solutions (+5% org.) are offsetting decline in Display (-7% org.)

¹ Cardiovascular, Metabolism and Endocrinology (new Franchise name as of Q1 2021)

Q1 YoY EBITDA pre

- Organic EBITDA pre growth three times faster than sales growth
- Strong Life Science gross profit further boosted by Bavencio[®] milestones and continued cost discipline in all sectors
- FX burden of -8% across various currencies with largest negative impact from USD, BRL and JPY; partly mitigated by hedging

Balanced maturity profile: Lower refinancing risks & higher flexibility

Maturity profile as of March 31, 2021

¹No decision on call rights taken yet

Q1 2021: Overview

Key figures

[€m]	Q1 2020	Q1 2021	Δ
Net sales	4,370	4,631	6.0%
EBITDA pre	1,181	1,511	27.9%
Margin (in % of net sales)	27.0%	32.6%	
EPS pre	1.50	2.18	45.3%
Operating cash flow	516	1,216	135.4%

[€m]	Dec. 31, 2020	March 31, 2021	Δ
Net financial debt	10,758	10,081	-6.3%
Working capital	3,938	4,231	7.4%
Employees	58,096	57,933	0.0%

Comments

- Net sales growth of 6% driven by 12% organic growth and FX burden of -6%
- EBITDA pre increase, driven particularly by operating leverage in Life Science further boosted by Bavencio[®] milestones
- EPS pre driven by EBIT pre growth, supported by better financial result & lower effective tax rate
- Operating cash flow more than doubles, largely driven by strong EBITDA pre growth and favorable net working capital
- Significant reduction of net financial debt

Q1 2021: Reported figures

Reported results

[€m]	Q1 2020	Q1 2021	Δ
EBIT	716	1,043	45.7%
Financial result	-98	-59	-40.0%
Profit before tax	617	984	59.4%
Income tax	-159	-236	48.1%
<i>Effective tax rate</i>	25.8%	24.0%	
Net income	456	747	63.7%
EPS (€)	1.05	1.72	63.8%

Comments

- Strong performance across all sectors particularly in Life Science drives 46% EBIT growth
- Reduced interest expense and lower LTIP provisions drive improved financial result
- Effective tax rate at the higher end of the new guidance range
- EBIT growth, improved financial result and lower tax rate drive higher net income & EPS

Cash flow statement

Q1 2021 – cash flow statement

[€m]	Q1 2020	Q1 2021	Δ
Profit after tax	458	748	290
D&A	431	424	-7
Changes in provisions	16	-34	-50
Changes in other assets/liabilities	-23	160	183
Other operating activities	-10	6	16
Changes in working capital	-356	-88	267
Operating cash flow	516	1,216	700
Investing cash flow	-288	-346	-58
thereof Capex on PPE	-337	-309	29
Financing cash flow	542	6	-536

Cash flow drivers

- Strong increase in profit after tax driven particularly by Life Science, further boosted by Bavencio[®] milestones
- Provisions largely reflect various favorable developments in litigation positions
- Contribution from other assets/liabilities largely explained by tax positions
- Working capital upside mainly driven by higher payables (Q4 2020 phasing effect)
- Delta in investing cash flow primarily explained by divestment of Allergopharma in Q1 2020
- Capex driven foremost by Life Science capacity expansions

Adjustments in Q1 2021

EBIT Adjustments

[€m]	Q1 2020		Q1 2021

Healthcare

China's VBP: Round 4 bidding recently completed, sustained confidence in keeping base business approx. stable through 2021 and 2022

China Glucophage sales represent **only ~8% of the total base business** (2020 net sales)
 Sustained confidence in **approx. stable base business (org.) through 2021 and 2022**

1: hospital market for bisoprolol and metformin makes up ~70% of total market, this includes urban hospitals, rural hospitals, and community health centers; 2: Concor® price cut in the high single digit %; 3: alliance products; Acronyms: VBP = Volume-Based Procurement

Phase I

M1231
Bispec. MUC1xEGFR ADC
Solid tumors

M1774
ATR inhibitor
Solid tumors

peposertib
DNA-PK inhibitor
Solid tumors¹

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Cervical cancer 1L

M6223
anti-TIGIT mAb
Solid tumors²

M5049
TLR7/8 antagonist
Systemic lupus erythematosus /
Cutaneous lupus erythematosus

M5717
PeEF2 inhibitor
Malaria

Simplified overview excluding programs for which Merck KGaA, Darmstadt, Germany explores externalization opportunities and/or for which Company pursues only limited internal development activities

Phase II

berzosertib
ATR inhibitor
Small-Cell Lung Cancer³

tepotinib
MET kinase inhibitor
Metastatic Colorectal Cancer
*RAS/BRAF wt, MET amplified*⁴

tepotinib
MET kinase inhibitor
Non-small cell lung cancer,
*EGFR mutant, MET amplified*⁵

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Non-small cell lung cancer 1L/2L

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Locally advanced non-small cell lung cancer

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Biliary tract cancer 1L

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Cervical cancer 2L

bintrafusp alfa
TGFbeta trap/anti-PD-L1
Triple negative breast cancer
(HMG2A positive)

M5049
TLR7/8 antagonist
COVID-19 pneumonia

Phase III

xevinapant
IAP inhibitor
Locally advanced squamous cell carcinoma of the head and neck⁶

avelumab
anti-PD-L1 mAb
Non-small cell lung cancer 1L

evobrutinib
BTK inhibitor
Relapsing multiple sclerosis

Registration

tepotinib
MET kinase inhibitor
Non-small cell lung cancer,
METex14 skipping^{7,8}

avelumab
anti-PD-L1 mAb
Urothelial cancer 1L-M^{9,10}

ADC: Antibody Drug Conjugate; Bispec.: bispecific; 1L: first-line treatment; 1L-M: first-line maintenance treatment; 2L: second-line treatment;

¹ Study in combination with avelumab. ² Includes study in combination with bintrafusp alfa. ³ Includes studies (phase I/II) in collaboration with/ sponsored by external partners, e.g. NCI. ⁴ In combination with cetuximab. ⁵ In combination with osimertinib. ⁶ On March 01, Merck KGaA, Darmstadt, Germany announced a worldwide in-licensing agreement with Debiopharm, Switzerland, for the development and commercialization of xevinapant (Debio 1143). ⁷ As announced on February 03, 2021, the US Food and Drug Administration (FDA) has approved tepotinib for the treatment of adult patients with metastatic non-small cell lung cancer (NSCLC) harboring mesenchymal-epithelial transition (MET) exon 14 skipping alterations. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials. ⁸ As announced on November 26, 2020, the European Medicines Agency (EMA) has validated for review the application for tepotinib for the treatment of adult patients with advanced non-small cell lung cancer. ⁹ As announced on January 25, 2021, the European Commission (EC) has approved avelumab as monotherapy for the first-line maintenance treatment of adult patients with locally advanced or metastatic urothelial carcinoma. ¹⁰ As announced on February 24, 2021, Japan's Ministry of Health, Labor and Welfare (MHLW) has approved a new indication for avelumab as a first-line maintenance treatment for advanced bladder cancer. Additional information: Several combination studies (phase II) of avelumab with talazoparib, axitinib, ALK inhibitors or chemotherapy ongoing under sponsorship of Pfizer.

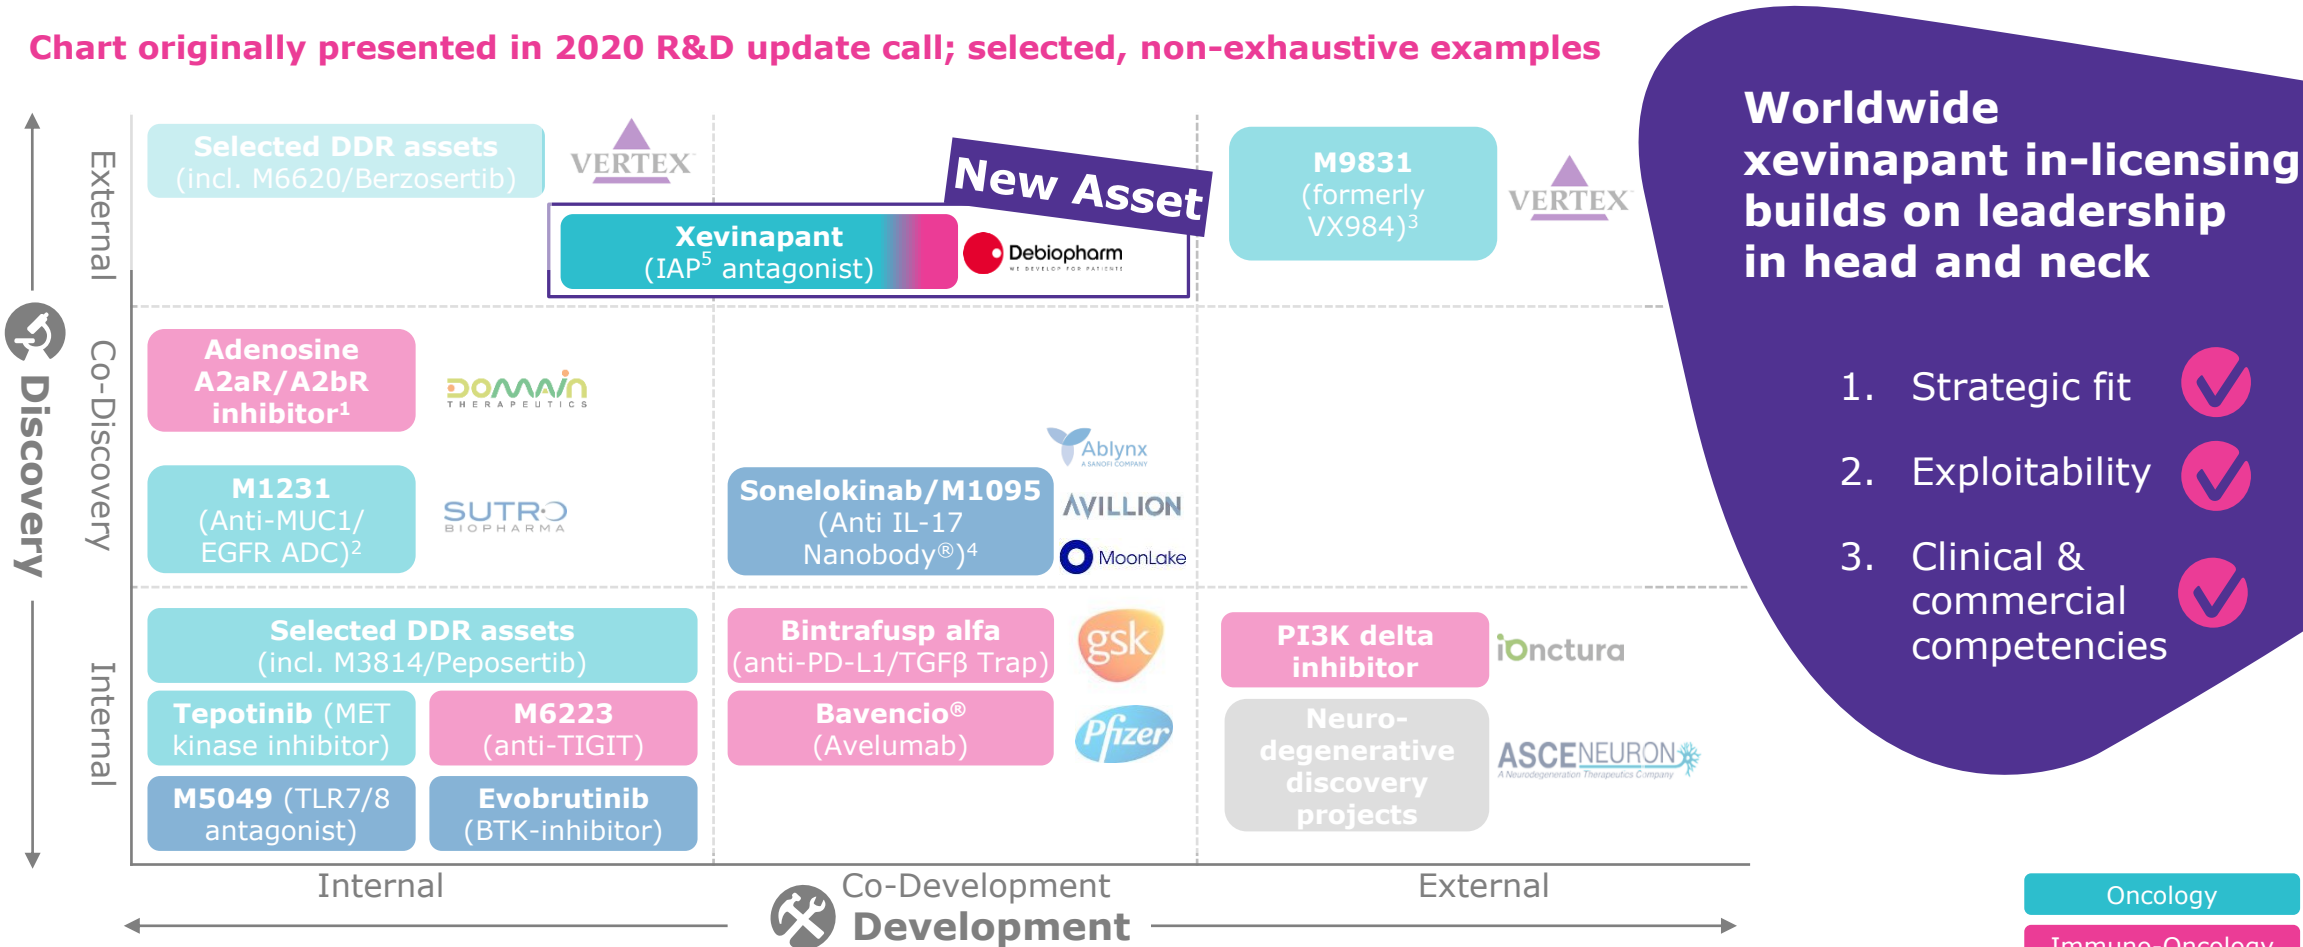

Unless noted otherwise, clinical programs conducted in collaboration with external partners are not shown unless Merck KGaA, Darmstadt, Germany has co-ownership of data. In such case the indication is shown in *italics*.

Pipeline products are under clinical investigation and have not been proven to be safe and effective. There is no guarantee any product will be approved in the sought-after indication.

Xevinapant

Potential to become standard of care in core area for the Group

1: In 2017, Domain Therapeutics and Merck KGaA, Darmstadt, Germany entered into a collaboration and licensing agreement for the development of adenosine receptor antagonist drugs specifically designed for oncology and immuno-oncology; 2: In 2014, Sutro and Merck KGaA, Darmstadt, Germany initiated a collaboration to discover and develop ADCs utilizing Sutro's cell-free protein synthesis platform, Xpress CF+™. Merck KGaA, Darmstadt, Germany is responsible for drug product, clinical development and commercialization of any resulting products; 3: In 2019, an exclusive license was granted to Vertex for the use of M9831 in gene-editing applications; 4: Avillion conducted Ph II of M1095 in Psoriasis, Merck KGaA, Darmstadt, Germany decided to out license sonelokinaab to a new partner to initiate Phase III development in 2021 5: Inhibitor of Apoptosis Proteins

Xevinapant (Debio 1143)

Potentially first in class oral IAP antagonist with FDA BTB

Mode of Action¹

- Oral Inhibitor of Apoptosis Proteins (IAP) antagonist: chemo-/radio-sensitizer & enhancer of anti-tumor immunity
- IAP antagonists tackling two cancer hallmarks:
 - Enhancing anti-tumor immunity
 - Lowering threshold for tumor cell death

Compelling Phase 2 data² published in *The Lancet Oncology*, and presented at ESMO 2020

- **Improvement in OS statistically significant** and clinically meaningful: **HR 0.49** (0.26–0.92); $p=0.0261$
- **Clinically compelling PFS improvement: HR 0.34** (0.17–0.68); $p=0.0023$
- Predictable and manageable safety profile without substantial additional toxicity to standard CRT

Acronyms: BTB = Breakthrough Therapy Designation; IAP = Inhibitor of Apoptosis Proteins; 1: Debiopharm; 2: ESMO 2020 - Late Breaking Abstract 39 - 3-years follow-up of double-blind randomized phase II comparing concurrent high-dose cisplatin chemo-radiation plus xevinapant or placebo in high-risk patients with locally advanced squamous cell carcinoma of the head and neck

Xevinapant

Total deal-volume of up to ~ €900 m and industry-typical sales royalties

Payment type	Amount (in €)	Accounting treatment ²
Upfront payment	~ €190 m	Largest part to be capitalized as an intangible asset
Approval milestones	Up to ~ €380 m ¹	To be paid and capitalized as an intangible asset upon approval and to be amortized once asset is ready for use
Commercial milestones	Up to ~ €330 m	To be paid and capitalized as an intangible asset, based on sales thresholds and to be amortized over remaining useful life
Sales	n/a	Group to recognize sales globally (incl. US)
R&D Costs	n/a	For ongoing TrilynX study <ul style="list-style-type: none"> ▪ Cash view: 50/50 cost sharing ▪ P&L view: fully shown in Group P&L 2nd study for cisplatin-ineligible patients: Company incurs 100% of cost
Royalties	n/a	Group to pay industry-typical sales royalty to Debiopharm

¹ thereof up to ~€300 m for focus H&N indications)

² final accounting treatment is still subject to alignment with auditors

Xevinapant (Potentially first in class oral IAP antagonist)

Two Phase III studies are designed to target the majority of unresectable LA SCCHN patients receiving systemic therapy + RT

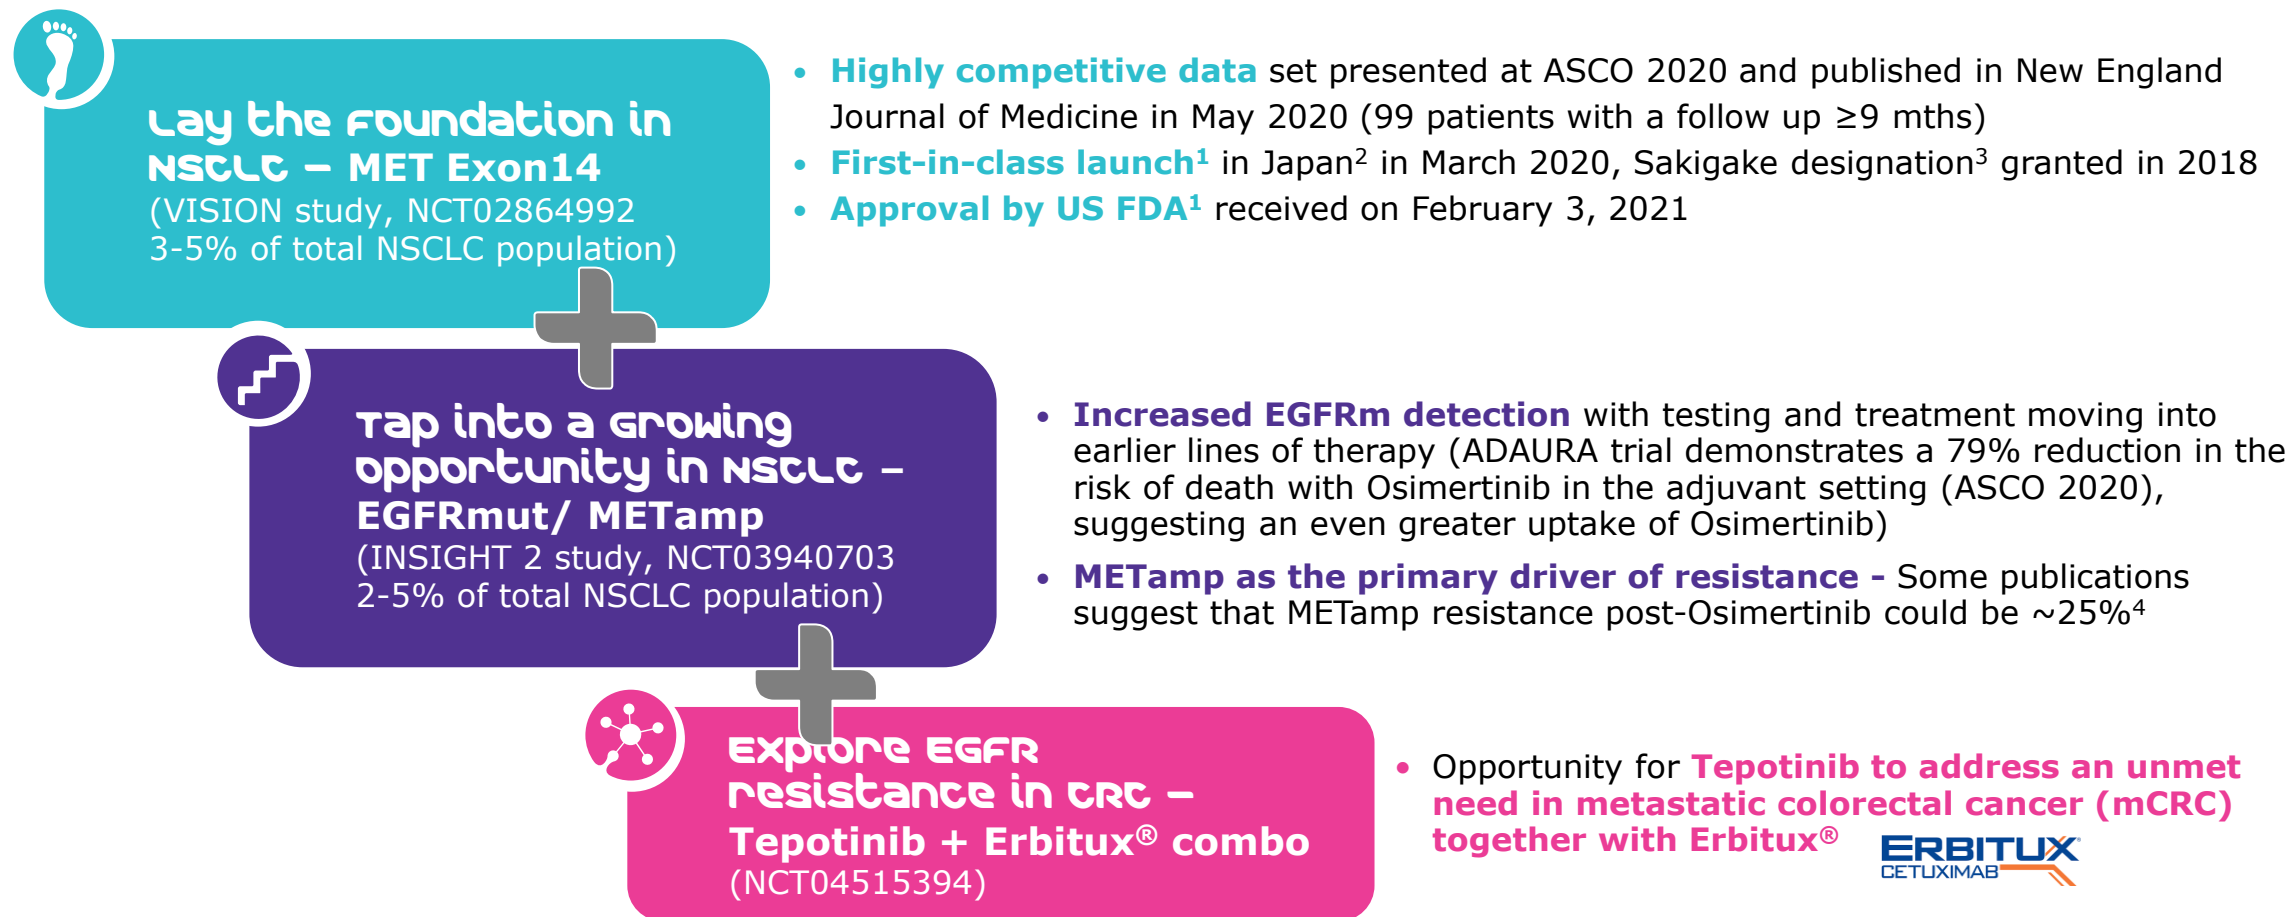

Blockbuster potential provided success of both studies

20,000+ unresectable LA SCCHN patients in US and EU-5 each

Tepotinib (MET kinase inhibitor)

First-in-class launch in MET Exon14 sets foundation for EGFRm/ METamp opportunity and exploration in other tumor types

1: approved for both treatment naïve and previously treated METex14 positive NSCLC patients; 2: second largest Oncology market globally; 3: SAKIGAKE designation promotes research and development in Japan, aiming at early practical application for innovative pharmaceutical products; 4: Piotrowska et al., "Landscape of Acquired Resistance to Osimertinib in EGFR -Mutant NSCLC and Clinical Validation of Combined EGFR and RET Inhibition with Osimertinib and BLU-667 for Acquired RET Fusion", AACR Cancer Discovery 2018; Acronyms: CRC = Colorectal cancer; EGFR = Epidermal Growth Factor Receptor; NSCLC = Non-small cell lung cancer

Tepotinib (MET kinase inhibitor) Tapping into the rapidly evolving EGFRmut/METamp market – Encouraging INSIGHT 1 data

INSIGHT 2 – Tepotinib + Osimertinib in Osimertinib Relapsed METamp NSCLC

Recruiting

- **Study design recently amended to reflect evolved and future standard of care:**
 - **Target population** – Inclusion criteria adjusted to focus solely on 1L Osimertinib failures
 - **Testing** - Streamline patient enrollment based on current gold standard method (TBx FISH)
 - **Increasing METamp prevalence** - Some publications suggest that METamp resistance post-Osimertinib could be ~25%¹
- Estimated primary completion date: **November 2022**

Tepotinib + Erbitux® (Cetuximab) - Addressing a significant medical need in 2L metastatic colorectal cancer (mCRC)

Recruiting

- Opportunity for **Tepotinib to address an unmet need in CRC** together with Erbitux®
- Estimated primary completion date: **March 2023**

A solid foundation - Encouraging INSIGHT 1 data (18-months follow-up presented at WCLC 2019)²

Endpoint	Tepotinib + gefitinib	Chemotherapy
Primary - PFS (HR 0.13 [90% CI 0.04, 0.43])	16.6 m	4.2 m
Secondary - ORR (OR 2.67 [90% CI 0.37, 19.56])	66.7%	42.9%
Secondary - OS (HR 0.09 [CI 0.01, 0.54])	37.3 m	13.1 m

Proof of Concept: MET amplification can be considered a suitable biomarker for treatment with Tepotinib

Safety: generally **well-tolerated**, most adverse events mild to moderate

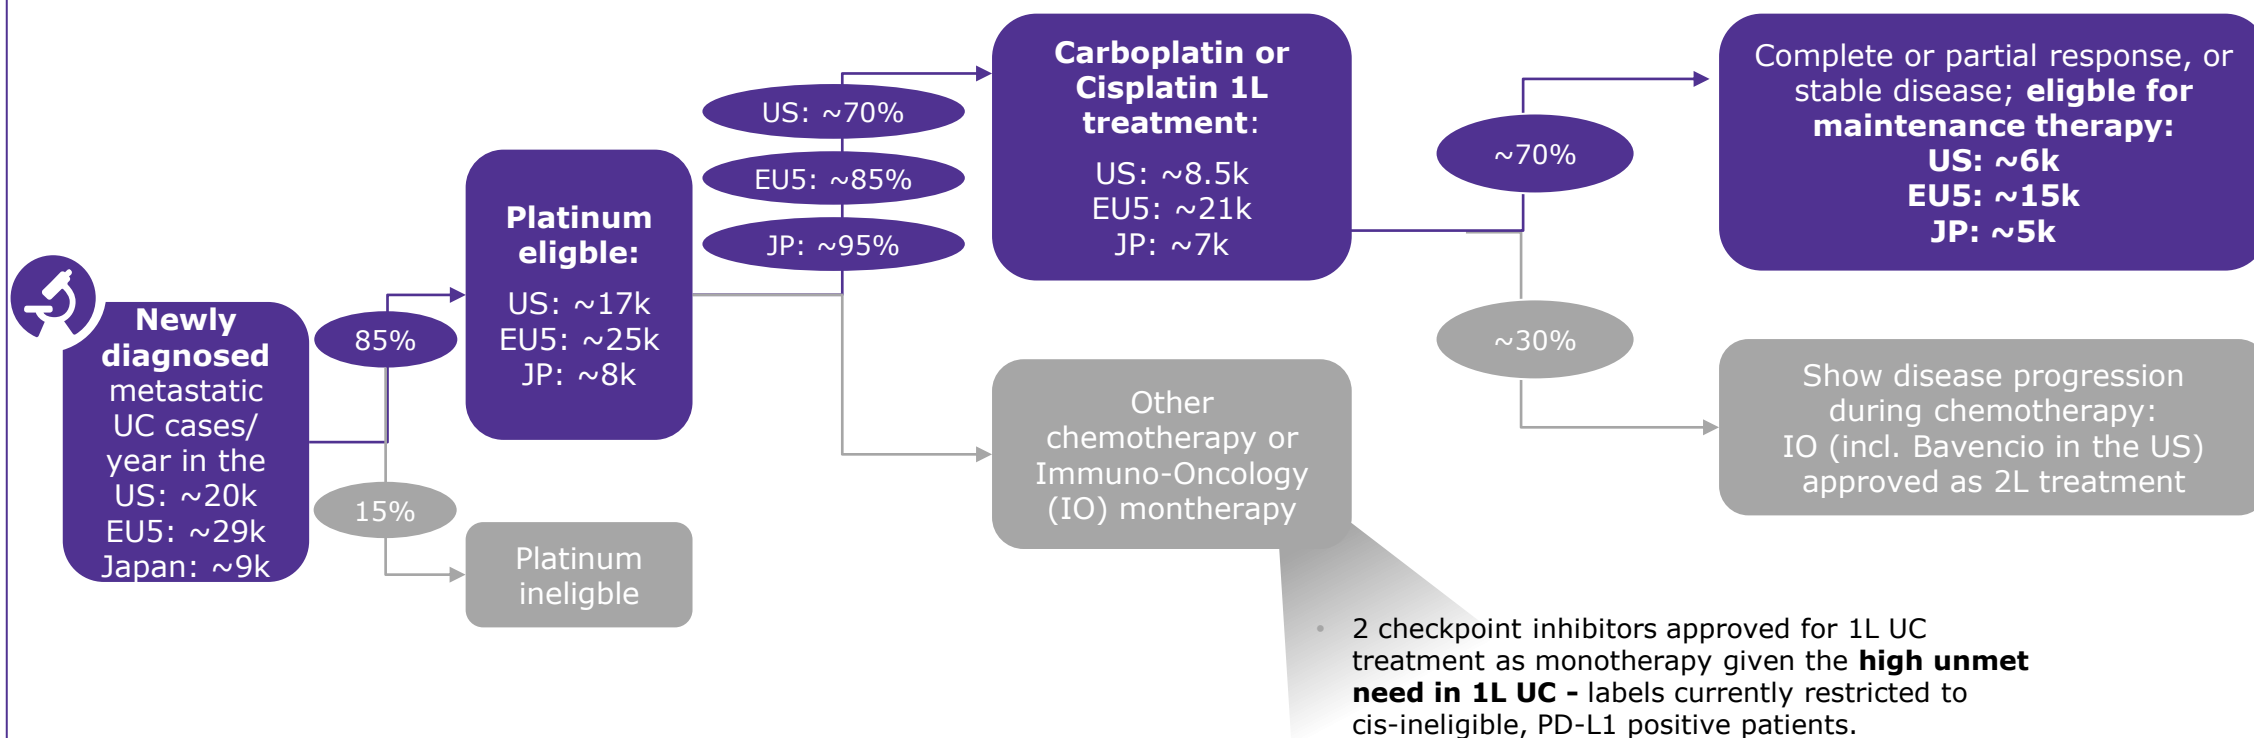

1: Piotrowska et al., "Landscape of Acquired Resistance to Osimertinib in EGFR -Mutant NSCLC and Clinical Validation of Combined EGFR and RET Inhibition with Osimertinib and BLU-667 for Acquired RET Fusion", AACR Cancer Discovery 2018; 2: Wu et al., "Long term outcomes to tepotinib plus gefitinib in patients with EGFR mutant NSCLC and MET dysregulation: 18 month follow up", presented at WCLC 2019; Acronyms: FISH = Fluorescence in situ hybridization; TBx = Tissue Biopsy

Bavencio® (Avelumab) – Urothelial Carcinoma (UC 1L)

UC 1L maintenance treatment achieving transformative OS benefit (31% reduction in risk of death, 7 months increase in median overall survival)

Durable responses to standard of care (1L chemotherapy) are rare with most patients experiencing progression within 9 months of treatment¹

1: Kantar Health Patient Metrics & Kantar Health Treatment Architecture for epidemiological data; IMS Claims, Kantar and IPSOS for triangulation of market shares

Bintrafusp alfa¹

An innovative first-in-class bifunctional fusion protein discovered in-house leading the TGF- β immuno-oncology field

Mode of action

- Innovative **first-in-class bifunctional fusion protein** designed to simultaneously target two immune suppressive pathways (blocking PD-L1 and reducing TGF- β signaling)
- Demonstrated **superior anti-tumor activity in pre-clinical study** compared to anti-PD-L1 alone, and anti-PD-L1 and TGF- β given in combination as separate agents
- **Great excitement in IO community** about M7824 uniquely addressing TGF- β biology widely accepted as key resistance factor for anti-PDx therapies

Clinical development achievements

- Tested in **14 Phase Ib expansion cohorts** across >700 patients in more than 10 tumor types
- Shown clinical anti-tumor activity across multiple hard-to-treat cancers including **advanced NSCLC, biliary tract cancer, HPV-associated cancers, and gastric cancer**
- PhII study **M7824 monotherapy versus pembrolizumab 1L**, advanced NSCLC high PD-L1-tumor expressers started in October 2018

Clinical development plans

- **Multiple high priority immuno-oncology clinical development studies** ongoing or expected to commence shortly, including **studies in non-small cell lung and biliary tract cancers with registrational intent** and most recently **advanced, unresectable cervical cancer**

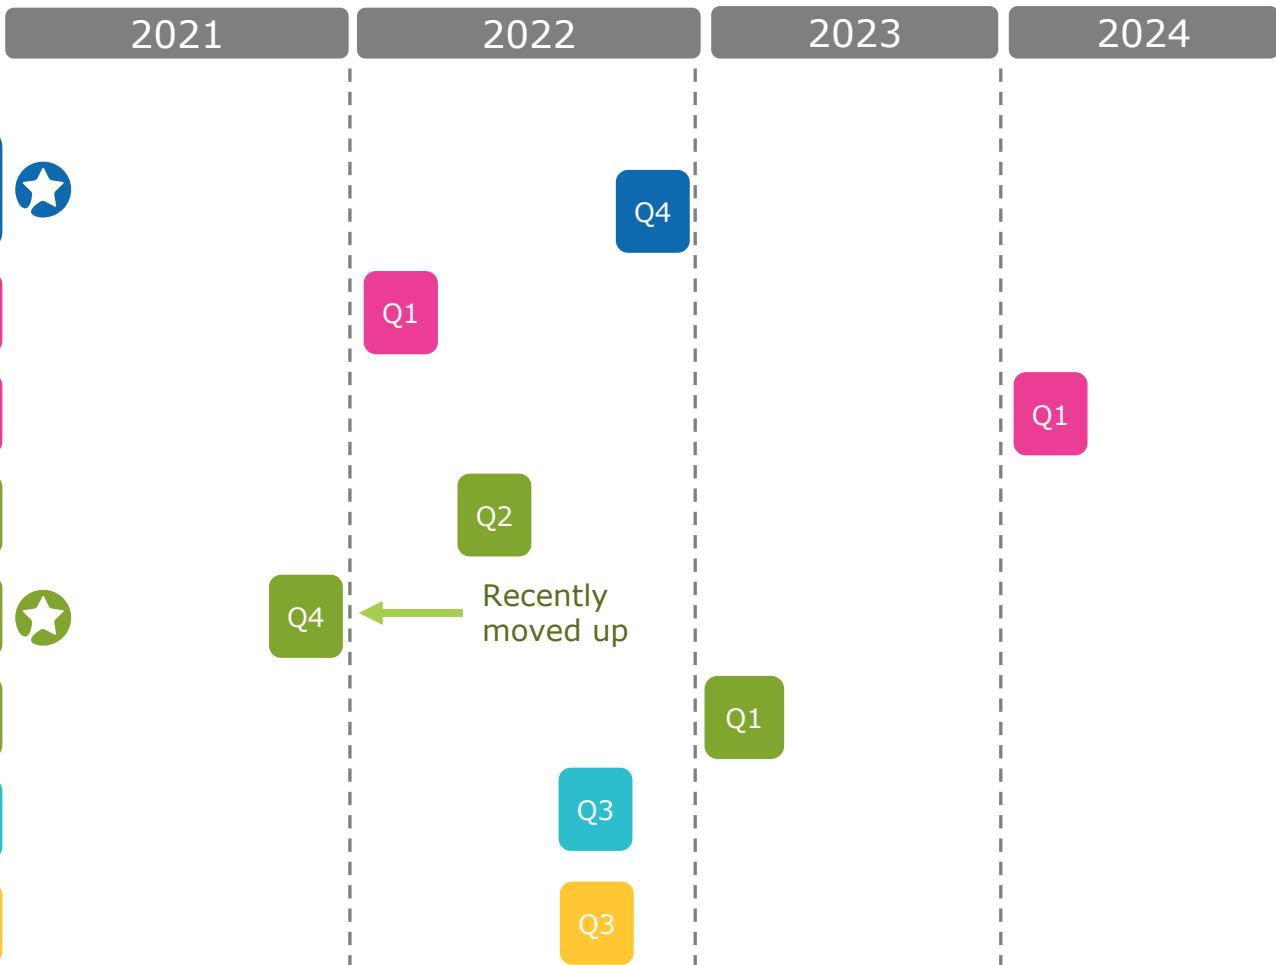

¹proposed International Nonproprietary Name (INN)

Acronyms: NSCLC = Non-small Cell Lung Cancer, IO = Immuno-Oncology

Bintrafusp alfa

INTR@PID Program: Upcoming Readouts

Acronyms: BTC = Biliary Tract Cancer; CT = Chemotherapy; EMT = Epithelial-mesenchymal transition; HPV = Human papillomavirus; NSCLC = Non-small Cell Lung Cancer; RT = Radiation therapy; TNBC = Triple-Negative Breast Cancer; * unresectable; **All clinical timelines are event-driven and may be subject to change**

Bintrafusp alfa: Developmental Progress

NSCLC Stage III cCRT Combo trial

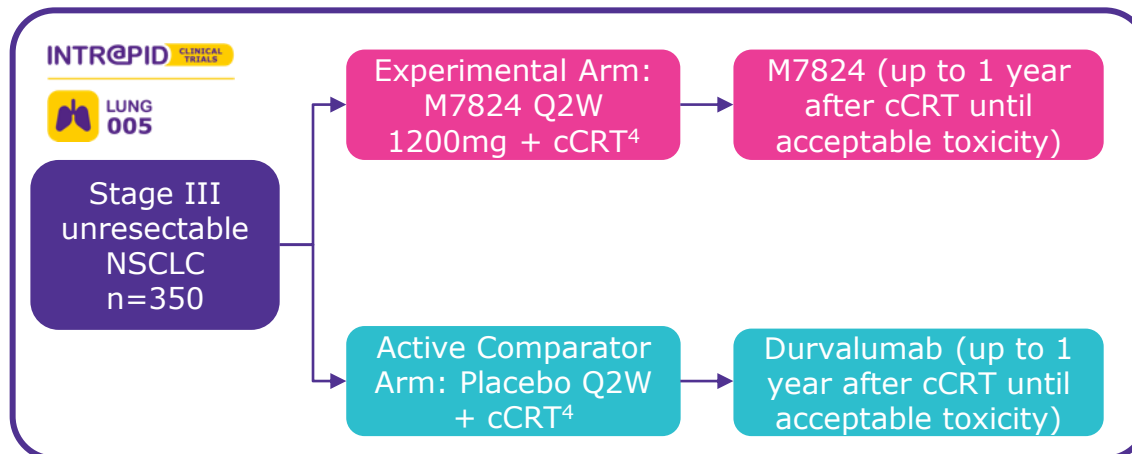

NSCLC 2L data presented at ESMO 2018

- **Need:** NSCLC accounts for 80-85% of all cases of lung cancer¹
- **Results: Encouraging efficacy comparing favorably** to established PDx-inhibitor monotherapy (IRC)^{2,3}:
 - **ORR (all-comers):** 25.0%
 - **ORR (PD-L1-positive):** 37.0%
 - **ORR (PD-L1-high):** 85.7%
- **Progression free survival by IRC (PD-L1 ≥ 1%):**
 - M7824: **mPFS = 9.5 months**, competitor: 4.0 months^{2,3}
- **Overall Survival by IRC (PD-L1 ≥ 1%):**
 - M7824: **mOS not reached**, competitor: 12.7 months^{2,3}

Pre-clinical data on M7824 + RT combo⁵

- M7824 and RT combination therapy **enhances antitumor activity relative to mono-therapies** in mouse models
- EMT, VEGF, and RT-induced fibrosis gene signatures are decreased with M7824 and combination therapy, and **M7824 reduces RT-induced fibrosis**
- Results **support evaluation of M7824 + RT in the clinic**

INTR@PID LUNG 005

Endpoints

Primary endpoint: PFS

Main secondary endpoints: OS, Safety, Pulmonary function, Association of PD-L1 expression at base line and efficacy

Bintrafusp alfa: Developmental Progress

Data shown at AACR 2019 highlights opportunity in HPV-related cancers

Efficacy variable	HPV-associated cancer (n=43)	HPV+* (n=36)
Confirmed BOR, n (%)		
CR	2 (4.7%)	2 (5.6%)
PR	10 (23.3%)	9 (25%)
SD	6 (14.0%)	5 (13.9%)
PD	20 (46.5%)	17 (47.2%)
Not evaluable	5 (11.6%)	3 (8.3%)
Delayed PR [†]	3 (7.0%)	3 (8.3%)
ORR per RECIST v1.1, n (%) [95% CI]	12 (27.9%) [15.3–43.7]	11 (30.6%) [16.3–48.1]
Total clinical response rate[†], n (%)	15 (34.9%)	14 (38.9%)
DCR, n (%)	18 (41.9%)	44.4%

Prevalence: >630,000 new cases of HPV-related cancer are reported worldwide annually¹

Response Rates:

- Bintrafusp alfa response rates **compared favorably to those with anti-PD-1 inhibitors** (ORRs of 13%–24%)¹⁻⁷
- **ORR was 27.9% and 30.6% in HPV-associated and HPV+ cancers, respectively**
- Including three additional patients with delayed PRs after initial PD: **Total response rate was 34.9% and 38.9% in HPV-associated and HPV+ cancers, respectively**

Long-term Benefit:

- **Most responses durable** with 4 responses having DoR >18 months and 11/15 responses ongoing at the data cutoff
- Responses to bintrafusp alfa occurred **irrespective of tumor type** or PD-L1 expression
- **Safety profile was similar to anti-PD-(L)1 therapy^{1,5}** except for SCC/KAs and low grade mucosal bleeding which are anticipated AEs with TGF- β inhibition^{8,9}

Cervical Cancer 2L study recently posted on ct.gov

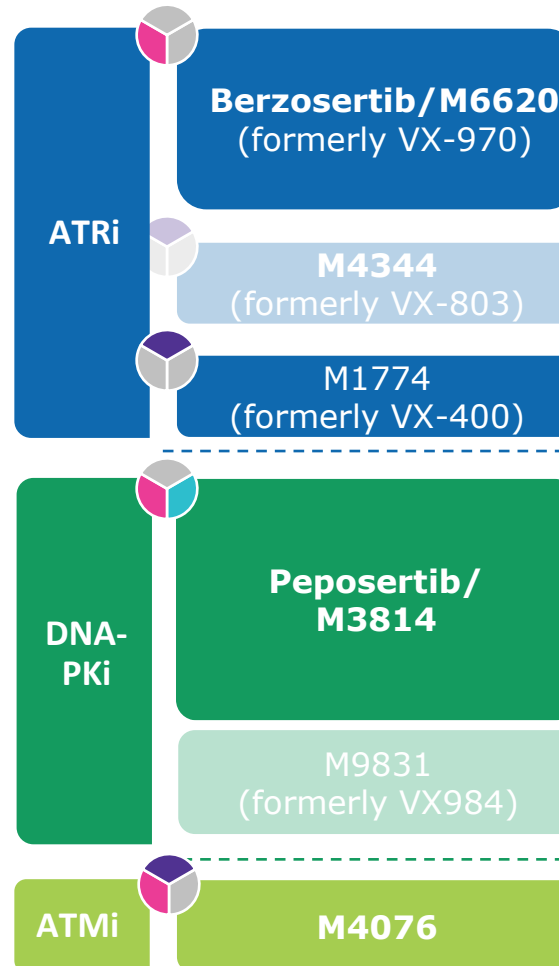

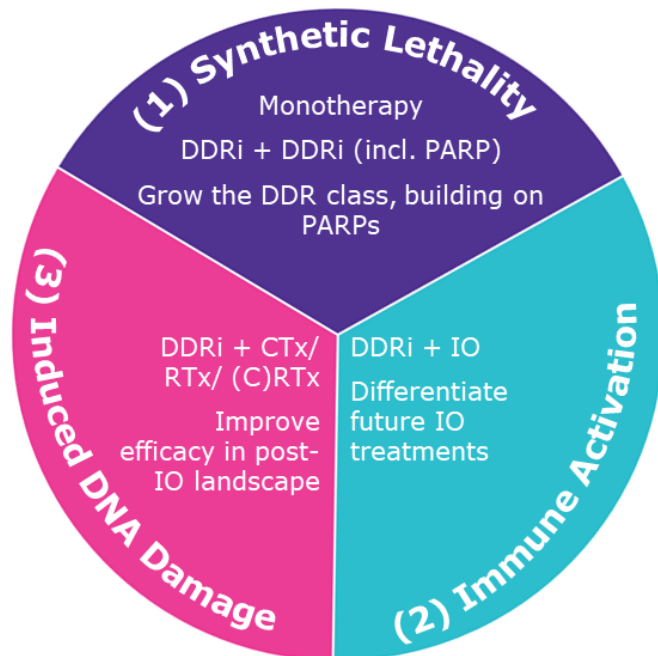

[†]Due to confirmed PD before onset of response, these patients did not meet response criteria by RECIST v1.1; *HPV status was determined from prior documentation, or by using cobas® 4800 HPV Test (Roche) in the dose escalation phase or RNA sequencing (RNASeq) in the expansion phase. ¹Baumli J, et al. DNA Damage Response (DDR)

Leading DDR portfolio with a broad clinical program

Strategy presented at R&D Update Call 2019

- Only ATR-inhibitor with a POC from an RCT (Ovarian cancer, Berzosertib +/- Gem)
- Multiple NCI studies in various tumor types
- Promising Phase II data (Small cell lung cancer) recently published in "Cancer Cell"
- Phase II SCLC trial recently initiated
- Development recently terminated due to prioritization of M1774
- Phase I FiH monotherapy study ongoing. Expansions to investigate combinations under discussion.
- Ph Ib/II in Rectal cancer (CRT combo) recently discontinued
- Combo with Avelumab: Study with and w/o RT ongoing (PhI, solid tumors)
- Multiple NCI studies in various tumor types
- Exclusive license¹ granted to Vertex in 2019 for use in gene-editing applications
- Clinical candidate/ready for Phase I trials, chemical structure first disclosed at AACR 2019

1: incl. upfront payment + milestone/royalties on future sales; Acronyms: ATMi = Ataxia telangiectasia-mutated; ATRi = Ataxia telangiectasia and Rad3-related inhibitors; CRT = Chemoradiotherapy; DDR = DNA Damage Response; DNA-PKi = DNA-dependent Protein Kinase Inhibitor; PARP = poly(ADP-ribose) polymerase inhibitor; POC = Proof of concept; RCT = Randomized Controlled Trial; RT = Radiation Therapy

We pioneered BTKi development for MS with Evobrutinib

Potential to have 3 complementary MS branded products by 2025

Unmet need in Multiple Sclerosis (MS) – Need for new mechanisms to control disease

- ~50% of patients with **Relapsing MS (RMS)** continue to have ongoing disease activity over 2 years even when treated with the most effective agents
- No therapy with impact on **progression** mediated by **CNS myeloid cells**
- **Systemic side effects** of therapies limit patient acceptance and compliance
- All approved higher efficacy therapies **associated with elevated risk of infection**

B-Cell Targeting + High-Efficacy (HE) Orals represent >60% of MS sales

- ✓ **BTKi is a novel class** of non-depleting therapies selectively targeting both B-cells and innate immune cells including disease progression-relevant microglia
- ✓ Merck KGaA, Darmstadt, Germany was the **first to conduct a full Phase II dose-ranging study in MS with Evobrutinib**, a highly selective covalent BTKi²
- ✓ **Merck KGaA, Darmstadt, Germany** is a **growing MS player** and could have 3 complementary branded products by 2025 – Mavenclad®, Rebif®, Evobrutinib

Platform agents – interferons, copaxone, DMFs and Teriflunomide; Other HE (high-efficacy) – cladribine, S1Ps, alemtuzumab; B-cell Targeting – ocrelizumab, ofatumumab, ublituximab. Includes branded products, generics and biosimilars; 1: Merck KGaA, Darmstadt, Germany internal estimates; 2: Montalban et al. NEJM 2019; 380:2406-2417; Acronyms: BTKi = Bruton's tyrosine kinase inhibitor

Evobrutinib stands out amongst BTK inhibitors under development

Uniquely positioned both in terms of clinical evidence and mode of action

	Fenebrutinib##	Tolebrutinib**	Evobrutinib
Clinical Evidence	Long-term* efficacy on relapses	✗	✓ ⁽¹⁾
	Long-term* safety	✗	✓ ⁽¹⁾
	Convenience (oral)	✓ BID	✓ BID
	Exposure in CSF	✗	✓ ⁽³⁾ in MS
	Biomarker of inflammation and progression in MS patients (sNfL)	✗	✓ ⁽³⁾
Preclinical data	BTK occupancy in the CNS	✗	✓ ⁽⁴⁾
	Efficacy in progressive EAE model and reduction of leptomeningeal inflammation[#]	✗	✓ ⁽⁶⁻⁸⁾

Phase III studies: Recruitment on track → Target data in-house in Q4 2023 and potential filing shortly after

✗ : not reported

*Long term is defined as the continuous treatment of MS patients for at least 96 weeks; **Extension to Phase II clinical trial in MS ongoing; #Defined as having an evidence on all the following: Inhibition of leptomeningeal and cortical inflammation and progression in preclinical models; ## No reported data in MS patients; 1: Montalban et al., triMS.online conference 2020; 2: Smith et al., ACTRIMS 2019; 3: data on file; 4: Francesco et al., ECTRIMS 2017; 5: Boschert U et al., ECTRIMS-ACTRIMS 2017; 6: Kim et al., ECTRIMS 2020; 7: Alankus YB et al., ECTRIMS 2018; 8: Rijvers et al., ECTRIMS 2020; Acronyms: sNfL serum Neurofilament Light Chain; BID twice a day; QD once a day; HV healthy volunteers; MS multiple sclerosis

Evobrutinib has the potential to tackle Multiple Sclerosis directly in the brain

- Evobrutinib was quantifiable **in CSF of 9 of 9 clinically stable RMS patients** administered the efficacious 75 mg BID dose in the RMS Phase 2 OLE study*
 - Plasma PK were at steady-state and consistent with other RMS Phase2 patients
- CSF concentrations are consistent with free plasma concentrations**
- The **measured CSF concentrations are biologically relevant**
 - Median BTK trough occupancy >95% observed at similar plasma concentrations

Evobrutinib targets inflammation and progression

Dual mechanism of action offers an innovative oral approach to MS therapy

MOA on B-cells and macrophage/microglia cells is an **innovative oral approach to MS therapy** with potential to impact compartmentalized inflammation and progression

Figure modified from:
Li R, et al. 2018.

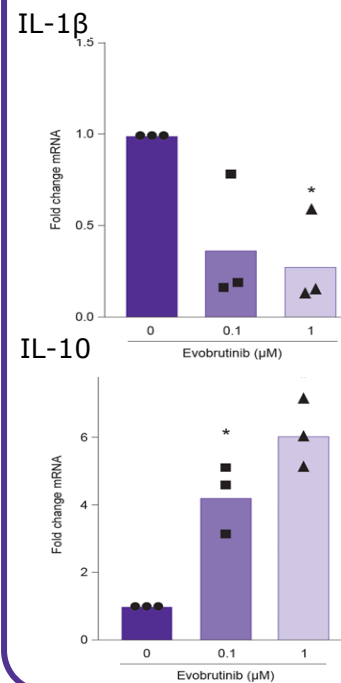

Evobrutinib is a CNS penetrant BTKi²

CNS exposure in EAE mice

Evobrutinib shifts macrophage phenotypes from M1 pro- to M2 anti-inflammatory³

Macrophages after GM-CSF activation

Evobrutinib reduces CNS B cells and leptomenigeal inflammation⁴

Leptomeningeal structures

Vehicle:

Evobrutinib:

EAE in SJL/J mice

- Important role of macrophage/microglia cells in addition to B and T cells in both **periphery and CNS**¹
- Evobrutinib **reaches brain** to potentially impact compartmentalized inflammation²
- Effects may be mediated through effects on **CNS-resident and CNS-migrating cells**^{3,4}

Evobrutinib is optimally dosed to offer best-in-class BTK inhibition

Optimized dose selection & targeted covalent binding results in sustained BTK inhibition that is necessary for robust efficacy

Evobrutinib holds unmatched Long-Term Data among BTKi class in MS

Best-in-disease efficacy & favorable safety over 2 years in largest Phase II study in MS

Evobrutinib
(BTK-inhibitor)

- Evobrutinib is the **only BTKi to have demonstrated very high, sustained efficacy and favorable safety** in the largest Phase II study in MS (n=267), with an ARR of confirmed relapses of 0.12 up to 108 weeks¹
- Evobrutinib **impacts sNfL levels**, a biomarker of neuronal damage, reflecting **disease activity and drug response in patients with MS³, starting at 12 weeks** and maintained through 24 weeks²
- Evobrutinib is **highly selective resulting in targeted kinase inhibition**, and its safety data in >1200 patients over 2+ years supports the potential for an **optimal long-term safety profile²**

M5049 (TLR7/8 antagonist)

TLR7/8 are drivers of SLE pathology and possibly of COVID-19

Mechanism of Action¹

- M5049 (**discovered in-house**) is a **potentially first-in class small molecule** that blocks activation of Toll-like receptors TLR7 and TLR8, two innate immune sensors that detect single-stranded (ss) RNA from viruses such as SARS-COV-2, the virus responsible for COVID-19, and inflammatory self-RNAs in the context of autoimmunity
- Activation of TLR7/8 leads to immune cell activation and inflammation, which when not properly controlled can cause severe immunopathology

Results from Phase I study in healthy volunteers

(NCT03676322)¹

- **Well-tolerated** over the dosing interval, no significant or dose-limiting adverse event
- Pharmacokinetic parameters linear and dose-proportional from 1 to 200 mg
- Exposure-dependent inhibition of ex vivo-stimulated IL-6 secretion observed, with maximum inhibition achieved at 200 mg

Preliminary Phase I data warrant further investigation as a potential treatment for autoimmune diseases including SLE

1: Port et al., A PHASE I, FIRST-IN-HUMAN STUDY TO ASSESS THE SAFETY, PHARMACOKINETICS AND PHARMACODYNAMICS OF SINGLE AND MULTIPLE ASCENDING DOSES OF M5049, A DUAL ANTAGONIST OF TLR7/8, IN HEALTHY SUBJECTS, *Lupus Science & Medicine* 2020;7(Suppl 1):A1–A131, conference cancelled due to COVID-19; 2 Adapted from ImmunoHorizons July 1, 2018 Dowling, D; Acronyms: SLE = Systemic lupus erythematosus; TLR = Toll-like receptors

M5049 (TLR7/8 antagonist)

Similarities between SLE and COVID-19

Similarities between SLE and COVID-19¹

1: Illustration created in-house; Acronyms: SLE = Systemic lupus erythematosus

Phase II study started in July 2020

Rational:

- Investigate if M5049 intervention at critical point in course of COVID-19 disease may prevent or ameliorate hyper-inflammatory response in patients with COVID-19 pneumonia and **prevent progression to 'cytokine storm'**
- Successful intervention with investigational drug may reduce life-threatening complications of COVID-19, including severe respiratory symptoms often necessitating further interventions such as mechanical ventilation

Design:

- Phase II randomized, controlled clinical study
- Commenced in July 2020

Results:

Dependent on recruitment and COVID-19 infection rates
First results expected in Q3/Q4 2021

Healthcare: strong Fertility & Oncology performance, while Mavenclad® remains impacted by depressed dynamic market

Healthcare P&L

[€m]	IFRS		Pre	
	Q1 2020	Q1 2021	Q1 2020	Q1 2021
Net sales	1,701	1,639	1,701	1,639
M&S*	-423	-370	-423	-365
Admin	-79	-73	-78	-69
R&D	-417	-416	-417	-415

EBITDA	501	523	-	-
EBITDA pre	472	533	472	533
(in % of net sales)	27.8%	32.5%	27.8%	32.5%

Comments

- Mavenclad® growing +26 % organically to €147 m, amid still depressed dynamic market; Rebif® decline -17% in Q1 due to tough comps related to tender win in Q1 2020
- Oncology up +20%, Bavencio® sales doubled post UC 1L launch in U.S. and initial contribution from EU & JP¹; Erbitux® up +10% largely driven by China growth
- Base business about stable, strong Fertility growth (+22% org.) compensating for Rebif® and CM&E decline (-4% org.)
- Strong savings in M&S from continuous rigorous cost discipline, supported by reduced face-to-face activities amid pandemic
- R&D flat as a result of continued prioritization; no significant COVID-19 related project delays
- EBITDA pre and margin significantly supported by Bavencio® milestones (~ €50 m)

Process Solutions

Next-generation bioprocessing on the cards

Today's
process & portfolio

Tomorrow's
process

MAb process intensification 2017 - 2020+

continuous processing >2025

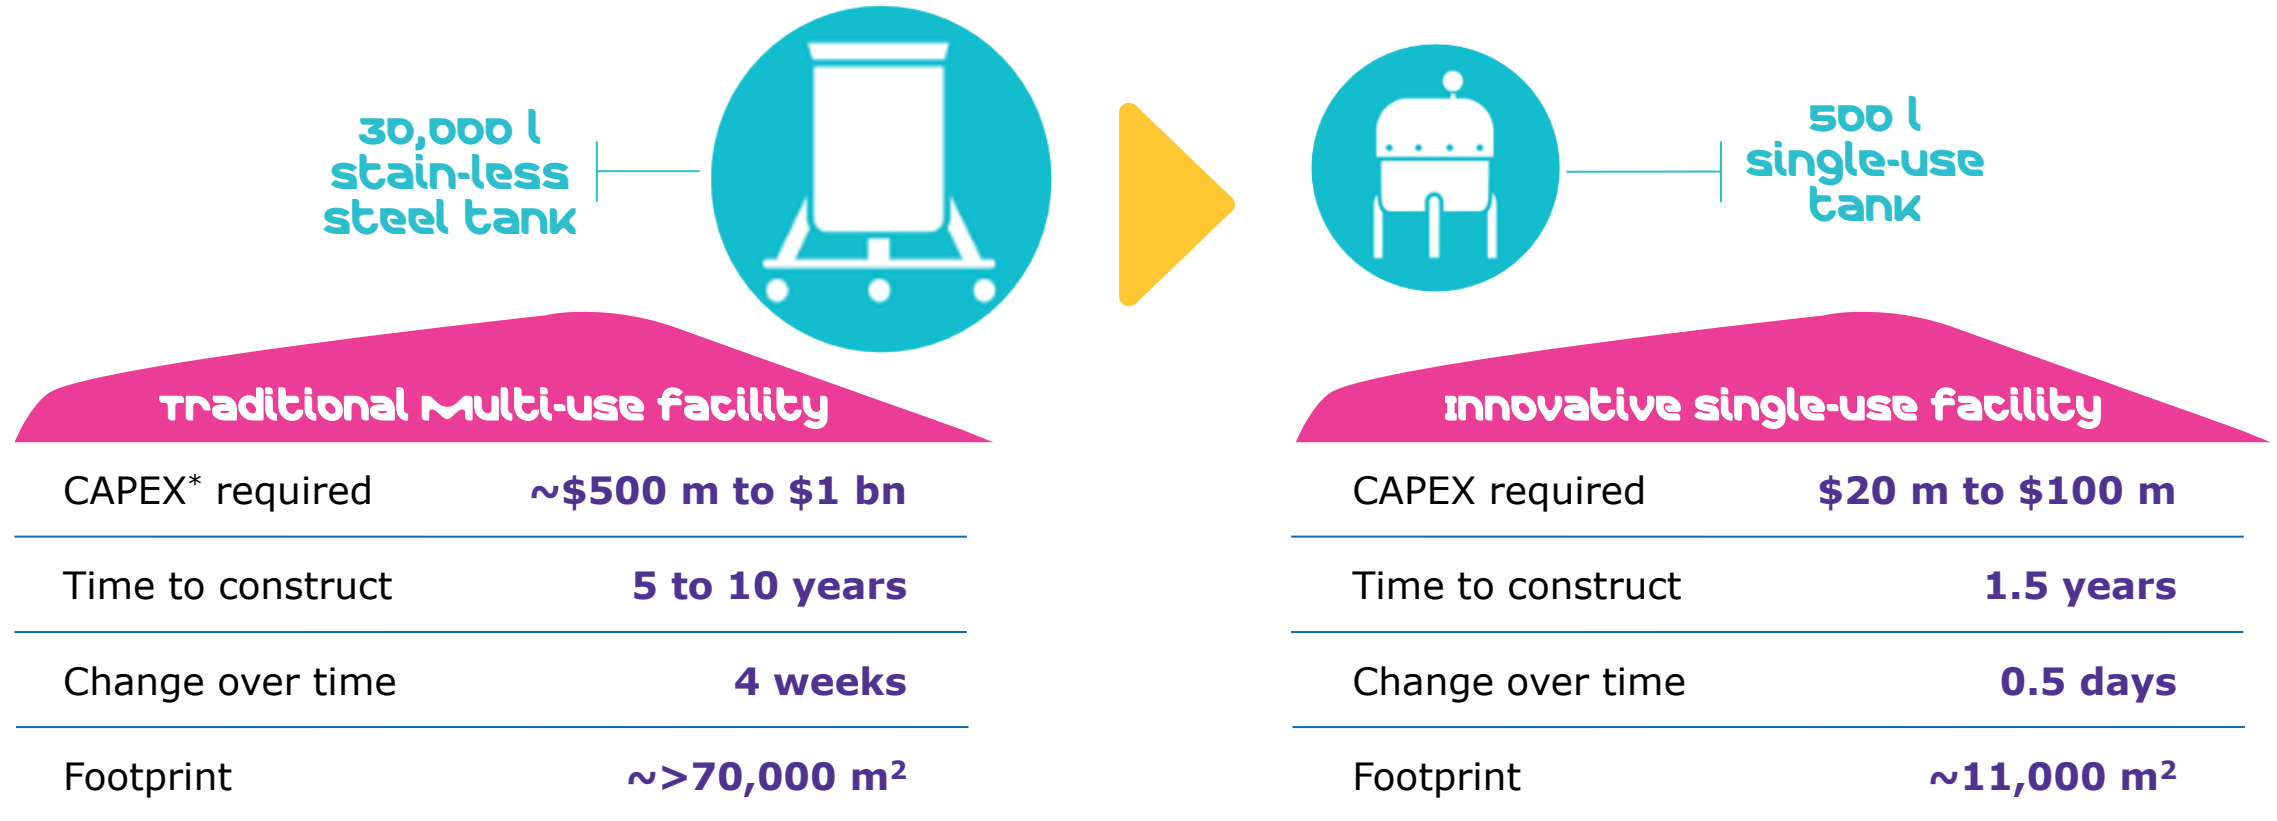

Continuous bioprocessing will ...

- be an evolution in mAb bioprocessing
- take time to establish
- leverage the present
- lead to hybrid solutions

Process Solutions

Our single-use technologies drive flexibility in modern bioprocessing

Strong demand for single-use technologies and Process Solutions' broad offering was and will remain a key source of growth for Life Science

Process Solutions

mAbs market democratization will drive diversification, change & variability

mAb volume projections 2020 to 2024

¹Biosimilars scaling factor = 2.8 based off internal estimates and McKinsey analysis;
Source: company estimate based on industry forecasts, EvaluatePharma; mAbs = Monoclonal antibodies

Market development

- Overall mAbs market will grow ~11-15% CAGR
- Top 10 originator mAbs represent ~ 50% of market volume today and will decline to ~30% in 2024
- Biosimilars will gain share

BIG 3 - Process Solutions: upside potential continues to materialize

Sales development [€m] - org. growth [%]

- COVID-19 related projects in **BioP Single Use and Downstream** remain key drivers of ~ 50% additional pandemic-related growth
- Unprecedented growth across all regions particularly strong in **Asia** (>50% org.) in large parts driven by the recovery vs. Q1 2020 lockdown in China
- **Pharma & Biotech** customer segment remains by far the strongest growth driver
- **Comps will be getting tough** from Q2 2021 onwards, as base starts including significant COVID-19 business upside
- **FX headwinds of -7%** mute absolute numbers

Research Solutions: additional COVID-19 demand has gained momentum

Sales development [€m] - org. growth [%]

- **Ongoing core business recovery** boosted by additional **COVID-19 related demand**
- Unprecedented growth across all regions particularly strong in **Asia** (>30% org.) and **North America** (>20% org.)
- **Pharma & Biotech** customer segment strongest Q1 growth driver in absolute terms; **Diagnostics** customer segment showed fastest growth in relative terms
- Q2 2021 will be softest comp, against the COVID-19 induced lock-down dip in 2020
- **FX headwinds of -6%** mute absolute numbers

Life Science: strong core business and rising COVID-19 demand fuel record growth, particularly in Process and Research Solutions

Life Science P&L

[€m]	IFRS		Pre	
	Q1 2020	Q1 2021	Q1 2020	Q1 2021
Net sales	1,769	2,131	1,769	2,131
M&S*	-498	-501	-497	-500
Admin	-89	-82	-80	-74

²Source: Seagate, IDC April 2020, Merck KGaA, Darmstadt, Germany

Expanding the limits of how small you can go

Pattern collapse

AZ® rinse materials

As lines get narrower and closer together in advanced chip generation, lines tend to “stick” due to surface tension.

Lithography limitation

Directed self-assembly (DSA)

Block copolymer can generate small lines or contact holes by self-assembly. This allows miniaturization without expensive new equipment.

Wide features

AZ® shrink materials

Shrink materials “shrink” the gap between lines and, hence, allow the manufacture of narrower features otherwise not possible.

Group delivers highly innovative solutions for complex customer problems

Electronics

Display Solutions - OLED material market to exceed LC material market **already in 2021**

x% OLED shipment area / addressable material market [in % of total] Liquid Crystals OLED

Display shipment area¹
[km²]

- **Continued growth** across all technologies
- **OLED growing faster than LCD**, but **LCD to command 90+% area share** for foreseeable future

Addressable material market²
[€m]

- **Material value** per OLED display **higher** than in LCD
- **OLED material market to exceed LC material market by 2021**, but market split between **many more players**

¹Omdia; ²Internal Business Intelligence; Acronyms: LCD = Liquid-Crystal Display, OLED = Organic Light Emitting

Electronics: year-over-year and vs. Q4 2020 Semi growth as well as recovering Surface compensate Display Solutions decline

Electronics P&L

[€m]	IFRS		Pre	
	Q1 2020	Q1 2021	Q1 2020	Q1 2021
