

# Innovation a key driver of future sales growth

## Leveraging core competencies across business sectors

## Pairing innovation with data and digital

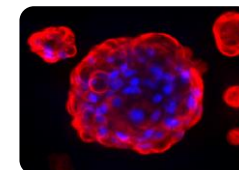

### AIDDISON™

Early molecule discovery fueled by generative AI, enabled by Healthcare database

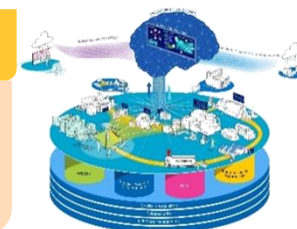

### Organoids

Promise to deliver faster and more accurate drug testing results compared to today's 2D approaches and to reduce animal testing

### Smart Manufacturing

For manufacturing excellence by design, maximized quality process performance and supply chain resilience

**To bring innovations faster to customers and patients**
