Merck KGaA, Darmstadt, Germany, Invests in Innovations for Future Growth

- Record-breaking year 2013 successfully concluded
- Acceptance level of AZ Electronic Materials acquisition at around 98%
- Dividend increase to € 1.90 and 2:1 share split proposed to shareholders
- Annual General Meeting elects shareholder representatives to the Supervisory Board

Frankfurt, Germany, May 9, 2014 – Following the conclusion of a record-breaking 2013, Merck KGaA, Darmstadt, Germany, a leading company for innovative and top-quality high-tech products in the chemical and pharmaceutical sectors, is planning to invest in innovations to ensure operational growth in 2014 and the years to come. "2013 was an excellent year for us - all four divisions were successful," Executive Board Chairman Karl-Ludwig Kley said today at the Annual General Meeting in Frankfurt. "As part of our 'Fit for 2018' transformation and growth program the focus of the next two years will be on growth. We are aiming for both organic and inorganic growth." To accomplish this, in-licensing agreements in pharmaceuticals and planned investments of around € 100 million in the biosimilars business are just as feasible as acquisitions. The acquisition of the high-tech material producer AZ Electronic Materials, which was completed last week, is a first step here, according to Kley. As of the night before, the acceptance level amounted to 97.8 percent of the AZ share capital.

growth of operating business, since declining royalty, license and commission income will lower EBITDA pre one-time items by more than € 100 million, Kley told shareholders. This forecast does not include effects from the AZ Electronic Materials acquisition. Merck KGaA, Darmstadt, Germany, will publish a detailed forecast for 2014 when it announces its first-quarter results on May 15.

For fiscal 2013, Merck KGaA, Darmstadt, Germany, reported solid organic sales growth of 4.2% to € 10.7 billion. Thanks to the accelerated implementation of efficiency measures, EBITDA pre one-time items increased by 9.7% to a record € 3.3 billion. Net income more than doubled to € 1.2 billion.

To allow shareholders to benefit from this record result, Merck KGaA, Darmstadt, Germany, proposed to the Annual General Meeting an increase of € 0.20 in the dividend to € 1.90. This increase of 12% takes into account that the Group is still in a period of transformation, Kley explained. Owing to the persistently high share price, Merck KGaA, Darmstadt, Germany, additionally proposed a 2:1 share split to raise the liquidity of its shares and make them even more attractive to private investors.

At this year’s Annual General Meeting, the eight shareholder representatives were to be newly designated. Merck KGaA, Darmstadt, Germany, had proposed the following six candidates for a five-year term of office:

Wolfgang Büchele, designated CEO of Linde AG and member of the Merck KGaA, Darmstadt, Germany, Supervisory Board since July 1, 2009, as Chairman of the Supervisory Board;
Michaela Freifrau von Glenck, teacher, member of the company’s Supervisory Board since March 28, 2008;
Albrecht Merck, Commercial Director of the Castel Peter Winery, member of the company’s Supervisory Board since January 1, 2005;
Helga Rübsamen-Schaeff, Managing Director of AiCuris GmbH & Co. KG;
Gregor Schulz, Chairman of the Board of Biotest AG, and
