MilliporeSigma Honored by R&D Magazine for Innovation

 Awards for AFS® water purification systems and Simplicon™ technology exemplify commitment to advancing life science

Billerica, Massachusetts, December 16, 2015 – MilliporeSigma, the U.S. life science business of Merck KGaA, Darmstadt, Germany, today announced it has received two prestigious R&D Magazine 100 awards – one for its lab water purification systems, and the other for a technology that allows researchers to investigate scientific questions they previously couldn't address.

The coveted awards, referred to as the "Oscars of Invention," honor the 100 most innovative scientific and technological breakthroughs introduced to the marketplace in the past year. Company representatives accepted the awards at the 53rd Annual R&D Awards ceremony November 13 in Las Vegas, Nevada.

"MilliporeSigma's researchers are relentlessly curious – aiming to provide the highest quality and most innovative products that solve the toughest problems in life science," said Udit Batra, President and CEO of MilliporeSigma. "We will continue to drive future advancements within our expansive portfolio. I am most appreciative of our colleagues who have dedicated their careers to these efforts."

The company's AFS water purification systems won in the process and prototyping category. The water systems, which can be found in labs around the world, incorporate the latest technologies to help clinical labs increase productivity, decrease analyzer downtime and enable robust performance.

News Release

Simplicon RNA Reprogramming Technology won in the analytical/test category. The kits allow a safe, efficient way of generating virus-free, human-induced pluripotent stem cells using a single transfection step, and give researchers an effective reprogramming method when studying diseases, allowing them to investigate unaddressed scientific questions

In 2014, two of the company's products – SmartFlare™ detection reagent and Clarisolve® depth filters – were named R&D 100 award winners.

Winners are selected by the editors of R&D Magazine and an independent panel of more than 70 judges.

MilliporeSigma, the U.S. life science business of Merck KGaA, Darmstadt, Germany, has 19,000 employees and 72 manufacturing sites worldwide, with a portfolio of more than 300,000 products enabling scientific discovery.

Merck KGaA, Darmstadt, Germany recently completed its \$17 billion acquisition of Sigma-Aldrich, creating a leader in the \$130 billion global life science industry. The name of the merged companies is MilliporeSigma in the U.S. and Merck KGaA, Darmstat, Germany elsewhere.

The acquisition was the largest in the company's 347-year history.

All Merck KGaA, Darmstadt, Germany, press releases are distributed by e-mail at the same time they become available on the EMD Group Website.
